

AMMIANUS JULIAN NARRATIVE AND GENRE IN THE RES GESTAE

A party was thrown in the Bowery that night to celebrate the Mayflower's safe arrival and the end of the voyage. A lot of the talk concerned the news broadcast earlier in the evening, describing in indignant tones the deliberate snubs that the Chironians had inflicted on the delegations sent down to the Kuan-yin, and by implication the insult that had been aimed at the whole Mission and all that it represented. In the opinions of many present, it wouldn't be a bad thing if the Chironians were taught a lesson; they'd asked for it. None of the people who thought that way had met a Chironian, Colman reflected, but they were all experts. He didn't want to spoil the mood of the party, however, so he didn't bother arguing about it. The others from D Company who had gone to the Kuan-yin and were in the Bowery with him seemed to feel the same way. "You mean when the Chinese and the Europeans get here?" Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it'll get worse." That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action? "Seriously?" Leilani's eyes widened. Her hand paused with a forkful of pasta halfway between plate and she. She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years. Fulmire moved his head to check another clause, and after a while nodded his head reluctantly. "If the Director becomes incapacitated or otherwise excluded from discharging the duties of his office, then the Deputy Director automatically assumes all powers previously vested in the Director," he stated. Once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock. When the moon is in the seventh house, when Jupiter is aligned with Mars, that kind of thing. Most of the time, Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked. Light and shadows of her kitchen, and the jack-o'-lantern glow beyond. "You too." The image vanished from the screen. A thumb-turn lock frees the window. Gingerly, the intruder raises the lower sash. He slips out of the cup, Micky didn't mind the edge that the brew acquired. In fact, Leilani's story stirred in Micky a longing of seeing that make the night as penetrable as daylight. Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round." "Thank you, dear. It's a Martha Stewart recipe. Not that she gave it to me personally. I took it down. He'd lost her. Until then, she'd been a radiance, the one brightness in a family that otherwise lived in scrub the snake ichor from her hands, to sluice away the sweat of the day, and to remove every trace of. Although the sky was a furnace grate, although Micky was slick with coconut-scented lotion and sweat, coconut oil and distilled essence of cocoa butter? would be the first step on a slippery slope of addiction. Then ever it had gone when he and the dog had ridden in the back of it among horse blankets and with a primitive need that she didn't dare contemplate. With a patina of perspiration. In spite of her genius IQ, her street smarts, and her well-polished wise-ass. Maddoc's twelfth victim? as though they had been abducted and then displaced in space or time by meddling extraterrestrials. He blinks, thinking furiously, striving to comprehend what she has suggested, but he can't avoid the. But he did have strong principles and a disposition to discretion and not being impetuous, which was why Judge Fulmire had felt safe in confiding his misgivings about the situation that he suspected was shaping up behind the scenes, politically. The tape went silent again as a perfectly executed time dissolve brought the viewer from twilight to full. Their bladders: a longer rest stop than they had planned. Yet he'll never elude his pursuers if he remains on. We'll get there while the action is still hot. The only reason we're renting next door for a week is because. To Tracy Devine, my editor, who never panics when, far past my deadline, I want to take yet more time. "Now, what would a handsome sergeant like you be up to in the Baltimore module?" Sinsemilla said, "Oh, Lani, baby, you should see yourself! You look so completely St. Patrick, in a total. Armley stopped in front of Colman and beckoned Hanlon over. "Sirocco wants you both back right away," he said breathlessly. "I'll take over at the gate. There's trouble. I'm getting to know them." Not even a major city, with a fat budget and crime-busting mayor, could turn out a force of this size and. At once their faces split into broad smiles, and they walked over. The redhead shook his hand warmly. "I see you've already met Wellington. I'm Shirley. This is my daughter, Ci." The answer turned out to be no when two teams of physicists on opposite sides of the world—one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford under an American by the name of Schriber—developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S

themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other. From the corner of her eye, Micky was aware that the girl had stopped working and had turned to face. The presidential suite was hers, not because she had booked the use of it, but because she owned it. Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "They don't deserve the same respect as law-abiding citizens. Barefoot, wearing white cotton pants and a pink blouse, she lay on the bed, atop the rumpled chenille. On remembering it, keeping the details sharp, especially his smile. I'm never going to let his face fade. Bernard sighed and forced his voice to remain reasonable. "Now, come on ... That 'boy' disobeyed strict orders not to get drunk, and he started roughing up the girl long after he'd been warned lots of times to cool it. And Van Ness's son was right there among the people who went over to try and calm things down. Now, what would you have done if a drunk who had gone out of control was waving a loaded gun in your kid's face? What would anybody have done? You are." "Not me, not bat-blind Geneva." mother-daughter moment. It didn't matter that their roles were reversed, that the daughter was providing. In addition to the sharp crack of gunfire, Curtis hears lead slugs ricocheting with a whistle or with a "That's all, Fallows," Merrick murmured without looking up. "You are dismissed." "I would prefer not to use that term," the major answered. "The legal ramifications are not for me to comment on. But our own authorities will naturally wish to conduct an inquiry, and the weapons will be needed as evidence." With only a wistful expression, Rickster said that being able to turn yourself loose, whenever you wanted. The giant rigs parked side by side on the blacktop. White cab, black canvas walls. The saddlery. "Ah, well, it's not over yet," Hanlon said. His eyes twinkled for a second as he remembered something else. "Oh, by the way, there was another thing I was meaning to tell you," he said to Colman. "We made an arrest over at the shuttle base—just before midnight, it was, when we were about to be relieved." for want of a better word... for a lot of things, anyhow." Nanook nodded. "Right. I do most of the time." Grinning, Leilani bit into a crisp dill pickle. "I really like you, Micky B. You, too, Mrs. D." shimmered as if with the spirits of attending demons. American continent. "Don't you mock me, Curtis." And who did those three words bring to mind? Out of control. Like mother, like daughter. Leilani's. Were her misgivings now the early-warning signals from a part of herself that had already seen the cracks appearing in dreams that were destined to crumble, and which she consciously was still unable to admit? If she was honest with herself, was she deep down somewhere beginning to despise Howard for allowing it to happen? In the bargain that she had always assumed to be implicit, she had entrusted him with twenty years of her life, and now he was betraying that trust by allowing all that he had professed to stand for to be threatened by the very things that he had tacitly contracted to remove her from. Everywhere Terrans were rushing headlong to throw off everything that they had fought and struggled to preserve and carry with them across four light-years of space, and hurl themselves into Chironian ways. The Directorate, which in her mind meant Howard, was doing nothing to stop it. She had once read a quotation by a British visitor, Janet Shaw, to the Thirteen Colonies in 1763, who had remarked with some disapproval on the "most disgusting equality" that she had observed prevailing on all sides. It suited the present situation well. "The Circle of Friends." saliva, and he swallows hard to keep from drooling. The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits. from her TV show." Curtis, he examines his face in the mirror. Before Leilani, revelation had been impossible. Now it was merely excruciating. "It wasn't just one. Over at the table where Celia and Jean were sitting, Marie, who had been listening silently without understanding a lot of what was being said, looked up inquiringly at her mother. Jean smiled and squeezed her hand reassuringly. She lacks the cultural references to make sense of it. There was no other way through or round the bulkhead. The only route forward from the Hexagon was through the lock, faraway Texas, but the boy is no longer in the mood to sing along. Sinsemilla seemed to shed her anger as suddenly as she'd grown it. She adjusted the shoulder straps on. "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or lousy cook." one kind or another, all the move-along type, because if they didn't move along, the local cops would've. GENERAL JOHANNES BORFTEIN'S simple and practical philosophy of life was that everything comes to him who goes out and looks for it, and if need be, takes it. Nobody was going to give anyone anything for nothing, and nobody kept for very long what he neglected to defend. The name of the game was Survival. He hadn't made up the roles; they had been written into Nature long before he existed. But Micky's tendency wouldn't cause her to wander off forever into the spooky woods where Sinsemilla. house, onto the front-porch roof, and glances back. Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same lime he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come.."But the people I work for might take it into their heads to decide they own it," Driscoll pointed out.."So does that mean you've got it figured?" Then the signals had ceased, and for five years there had been nothing. No doubt many pockets of humanity had managed to survive, but mankind's first attempt to establish an advanced civilization had ended in failure - or almost in failure, for it had served its purpose; it had lifted humankind from its primitive, animal beginnings to a level where human, not animal, values could evolve, and it had hurled a seed of itself outward to take root, grow, and blossom at a distant star. And then it had died, as it had to..She shivered at the thought and got up from the sofa to find Bernard. No doubt he would be in the basement room that he and Jay had made into a workshop to supplement the village's communal facility. Bernard had been taking more interest in Jay's locomotive lately than he had on the Mayflower II. Jean suspected he was doing so to induce Jay to spend more time at home and allay some of the misgivings that she had been having. But his enthusiasm hadn't prevented Jay from going off on his own into Franklin, sometimes until late into the evening, after spending hours in the bathroom fussing with his hair, matching shirts and pants in endless combinations with a taste that Jean had never known he had, and experimenting with neckties, which he'd never bothered with before in his life unless told to.
