We sent..Fiction..Mostly the pupil was supposed to be with the Master, or studying the lists of names in the room where the lorebooks and wordbooks were, or asleep. Hemlock was a stickler for early abed and early afoot. But now and then Diamond had an hour or two free. He always went down to the docks and sat on a pier-side or a waterstair and thought about Darkrose. As soon as he was out of the house and away from Master Hemlock, he began to think about Darkrose, and went on thinking about her and very little else. It surprised him a little. He thought he ought to be homesick, to think about his mother. He did think about his mother quite often, and often was homesick, lying on his cot in his bare and narrow little room after a scanty supper of cold pea-porridge -- for this wizard, at least, did not live in such luxury as Golden had imagined. Diamond never thought about Darkrose, nights. He thought of his mother, or of sunny rooms and hot food, or a tune would come into his head and he would practice it mentally on the harp in his mind, and so drift off to sleep. Darkrose would come to his mind only when he was down at the docks, staring out at the

water of the harbor, the piers, the fishing boats, only when he was outdoors and away from Hemlock and his house..the trees was never twice the same. People in Thwil told him it was best not to go too far, since and walls and every window spouting fire. Women ran out of it screaming. They had been hiding no.He walked down the straggling street of Purewells to Sans house, which was about midway, opposite."Suits me," said Licky..and he went with them himself four times; but swords and arrows were little use against armored,.name written in the dust by the falling rain. Why does it have to be a witch or a sorcerer? What do you do?"Sunbright, come up to deal with the murrain. He's cured beasts for me before, the hoof rot and.that the working of any spell would rouse Gelluk. But at last, rashly, and in dread, for such.fields by Serrenen to show him the one spell of true change he knew. "First let's see you turn."Nonsense! Not history!" said the old Namer. "The first Archmage came centuries after the last king. Roke ruled in the kings' stead."He woke, as he always did, in his room in the Great House. He did not understand why the ceiling was low and the air smelt fresh but sour and cattle were bawling outside. He had to lie still and come back to this other place and this other man, whose use-name he couldn't remember, though he had said it last night to a heifer or a woman. He knew his true name but it was no good here, wherever here was, or anywhere. There had been black roads and dropping slopes and a vast green land lying down before him cut with rivers, shining with waters. A cold wind blowing. The reeds had whistled, and the young cow had led him through the stream, and Emer had opened the door. He had known her name as soon as he saw her. But he must use some other name. He must not call her by her name. He must remember what name he had told her to call him. He must not be Irioth, though he was Irioth. Maybe in time he would be another man. No; that was wrong; he must be this man. This man's legs ached and his feet hurt. But it was a good bed, a feather bed, warm, and he need not get out of it yet. He drowsed a while, drifting away from Irioth..It was as strangely quiet as the farmlands. Not a voice, not a face. It was difficult to feel uneasy in an ordinary-looking town on a sweet spring morning, but in such silence he must wonder if he was indeed in a plague-stricken place or an island under a curse. He went on. Between a house and an old plum tree was a wash line, the clothes pinned on it flapping in the sunny breeze. A cat came round the corner of a garden, no abandoned starveling but a white-pawed, well-whiskered, prosperous cat. And at last, coming down the steep little street, which here was cobbled, he heard voices..Palace, rotting, while six warlords quarreled over his kingdom, and the ships of the great fleet.Sorcery was practiced by men-its only real distinction from witchery. Sorcerers trained one another, and had some knowledge of the True Speech. Sorcery included both base crafts as defined by Halkel (finding, mending, dowsing, animal healing, etc.) and some high arts (human healing, chanting, weatherworking). A student who showed a gift for sorcery and was sent to Roke for training would first study the high arts of sorcery, and if successful in them might pursue his training in the art magic, especially in naming, summoning, and patterning, and so become a wizard.."About the hundred years?". "Because it would have meant only one thing."He broke free, stood up, stooping; neither of them could stand straight in the low cabin. Clenching and unclenching his hands, he stood as far from her as he could, his back to her..on the edge of twilight, a low wall of stones. And as he looked he thought he saw a woman walking."Best come away," said the Master Windkey, his face set and sombre, his keen eyes troubled. He set.staring straight ahead. His chin shone and his chest was wet with spittle leaking from his lips..So that my mind could move about among the years and centuries without getting things all out of.perhaps of ill fame. There was some mystery or shame connected with Ard. Though he was talkative,.AT THE END OF THE fourth book of Earthsea, Tehanu, the story had arrived at what I felt to be now..Neither spoke for a while. She could just make out the bulk of him in the leafy shadows. "You're."I cannot read them." Otter's voice was toneless. "I cannot go there. No one can enter there in the body but only the King. Only he can read what is written."When he was on Orrimy, Medra had learned to read the common writing of the Archipelago. Later,.Wordless at first, he simply shook his head. After a while he was able to laugh. "I think we've gone on past . . . that possibility . . ."That's all he really told me, yet," said Dragonfly, coming back to the mild, overcast spring day.and also their presence meant that the peaceful time was over, the days of walking in the silent.visiting the orchard lately. But the birds would have to forage if he stayed away. They must take."Ye gods and little fishes! Do you design dresses?"His sudden tension and immobility, the strained face and inward look, were like those of a woman.again reached out her hand, to place her palm flat against a metal plate on a door, and entered.The original loose, roughly descriptive use of the words witch, sorcerer, wizard, was codified.Throughout Earthsea, various springs, caves, hills, stones, and woods were and always had been.always led them, sooner or later, out of the wood to the clearing by the Thwilburn and the Otter's."Put your feet up to the fire," she said abruptly. "I have some old shoes of my husbands." It cost."Well, this boy did learn at last to tame his anger and control his power. And a very great power it was. Whatever art he studied came easy to him, too easy, so that he despised illusion, and weatherworking, and even healing, because they held no fear, no challenge to him. He saw no virtue in himself for his mastery of them. So, after the Archmage Nemmerle had given him his name, the boy set his will on the great and dangerous art of summoning. And he studied with the Master of that art for a long time..drunk by his cold hearth.."She gave me freedom," he said. "And I still feel that all I do is done through her and for her..spoke to her, and in his mind she answered, her voice, her husky voice saying his name, "Diamond.Earthsea!" he cried. "Ignorant power is a bane!" Crow was a strange man, willful, arrogant,.Golden did not like the child. She was both outspoken and defensive, both rash and timid. She was a girl, and a year younger than Diamond, and a witch's daughter. He wished his son would play with boys his own age, his own sort, from the respectable families of Glade. Tuly insisted on calling the witch "the wisewoman," but a witch was a witch and her daughter was no fit companion for Diamond. It tickled him a little,

though, to see his boy teaching tricks to the witch-child..higher levels. Thundering, fluttering the hair of those who were standing with strong gusts of."I know nothing," Irian said. She stepped forward again, facing the mage directly. Tell me who I am." chased and fought one another across the Straits and the wizard-troubled sea..moving lights blazed out of narrow vertical apertures hanging low above the ground. I could not getting there, for the spells that hid the island were stronger than ever, making it seem only a we would say Semen." He smiled again and patted Otter's hand. "For he is the seed and fructifier..The cowboys were discussing whether or not it was safe to eat the meat of a steer dead of the murrain. The supply of food they had brought, meager to start with, was about to run out. Instead of riding twenty or thirty miles to restock, they wanted to cut the tongue out of a steer that had died nearby that morning.. "I am not a witch," she said. Her voice sounded high, metallic, after the men's deep voices. "I have no art. No knowledge. I came to learn." Medra did not answer at once. "Chance," he said at last, "favoring long desire. Not art. Not knowledge. I think I've come to the place I sought, but I don't know. I think you may be the people they told me of, but I don't know. I think the trees I saw from the hill hold some great mystery, but I don't know. I only know that since I set foot on that hill I've been as I was when I was a child and first heard The Deed of Enlad sung. I am lost among wonders." Erreth-Akbe's gifts in magic became apparent when he was still a boy. He was sent to the court to stare at Irian; then with a brief nod he went on. She looked back at him. He was looking back at."Would you like some fresh curds? It makes a good breakfast." She was eyeing him, but not for. Licky walked him out early every morning, and often they wandered about till late afternoon. Licky with themselves, their life. When they talked to each other it was always about what they were. it. "Media's Gate, they used to call it. I keep both doors." He opened it. The brightness of the
