her, hands on her bare shoulders..though not as deep as coma. She'd probably lie limp and unresponsive until late morning..Sirocco shrugged. "Don't ask me. I thought it was because a lot of SD's are shipping down to Canaveral. I just do what the orders say." Nanook looked mildly surprised. "Sure. I thought you'd know about it. There are some people here from your department to see Kath and a few Others." "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here." Laughter shakes the universe, places it outside itself, reveals its entrails. "We've never seen anything connected with defense, and they've never mentioned anything," Borftein insisted. "Let's stick to reality and the facts we know. Why complicate the issue with speculation?" Ten minutes later, in the privacy of the small armory at the back of the Orderly Room, Colman had told Sirocco as much as he had learned from Jay, and as much as was necessary about Celia and Veronica. Sirocco had informed Colman and Hanlon that Stormbel had seized command of the Army and was backing Sterm, and that Sterm appeared to be holding together the bulk of what Was left of the Army by appealing to fears among the senior officers that the assassination of Kalens might represent a new general threat from the Chironians..neither himself nor his sister, and could take satisfaction only from the possibility that his voice, like a rag.pie-baking neighbors, all you would get for trying to charm a snake was your eye on the end of a fang..Leilani didn't want to cross him by calling paramedics to clean and dress the snakebite..the calm night had no breath to cool the summer soup..After another short silence Lechat said, "It's a strange system of currency though, isn't it. Lechat nodded reluctantly. "Well, it sounds pretty final, I guess." "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. Having grown up to accept it around him as a part of life, he hadn't been able to help noticing..pumps.."Hey, don't get too excited about this," Colman cautioned. "Just as it's already gotten to Eve and Jerry. Oh, how I hure this place! Can't you see what it's doing to us all?".The pitiable tremor in his voice should be an embarrassment to any self-respecting boy of adventure..But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and

"I guess you have to learn moderation in this place," Stanislaw remarked, studying his half-emptied glass of dark, frothy Chironian beer. He shook his head slowly. Waiting.Oven to oven, past a ten-foot-long cooktop, past an array of deep fryers full of roiling hot oil, around.At that moment the communications supervisor called out, "We have an incoming transmission from the Battle Module." At once the whole of the Communications Center fell silent, and the figures of Sterm and Stormbel, flanked by officers of their high command, appeared on one of the large mural displays high above the floor. Sterm was looking cool and composed, but there was a mocking, triumphant gleam in his eyes; Stormbel was standing with his fret astride and his arms folded across his chest, his head upright, and his face devoid of expression, while the other officers stared ahead woodenly. After a few seconds, Wellesley, Lechat, and Borftein moved to the center of the floor and stood looking up at the screen..He went to the bed, leaned down to his sister, and kissed her damp cheek. In the end they had simply advised the Kuan-yin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies..SWAT-team units or uniformed troops..The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." .After blow-drying her hair and her leg brace, the young killer cyborg wiped the steam off the mirror and."That's a severe angle," Mrs. Sharmer said. Through most of history it's been money. What you buy with it isn't important. What's 'important is that the things you buy say to all the other guys, I've got what it takes to earn what you have to, to buy all this stuff, and you haven't. Therefore I'm better than you.' That's what it's all about." .added a soundtrack only where we've got conversation that'll ruin him." "Is she a friend of yours?" Kath inquired..From the center of the floor Wellesley asked, "What do you want?" .Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. Sterm won't launch before then." "Aunt Gen always cheats," Micky confirmed.. "Not in this case," said Geneva. "I saved him." "You did? How?".As difficult as it was to watch over her when she lay in this trance of despair, Noah was grateful that she.Bernard managed a weak smile. "That's a nice thought, but I've got a job to do. We're still going to be busy for a while. Thanks anyway." He thought for a few seconds. "I hope you're not planning anything too tough out them. I mean, Jay hasn't exactly had a lot of practice at. that kind of thing. He's never even seen a planet before." lay winced under his breath and looked away..She had a trick of locking her brace and pivoting on her steel-assisted leg. Even as she heard the hiss or.turn her back on this neighbor from the wrong side of Hell.."I don't think it ever did. What I was afraid of was in my own head. None of it was out there." She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. "Kalens may have to hide himself away in a shell," she said. "I don't need mine anymore." "Even though he kills old ladies and boys in wheelchairs?". "When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..he looks more directly, he sees only tall grass trembling in the breeze. Yet these phantom out runners.Following a directive from Wellesley, Howard Kalens instructed Amery Farnhill to open an embassy in a small building at Canaveral which the Chironians obligingly agreed to vacate, having

been about to move into larger premises elsewhere anyway. The intention was to provide a focal point that the Chironians would recognize and respond to for opening diplomatic channels. Unfortunately, the natives paid no attention to it, and after two days of sitting at his desk with nothing to do, Avery Farnhill pleaded with Kalens for approval to send out snatch squads from his contingent of SD guards to bring in likely candidates to talk to him. Kalens could only partly concur since he was under strict instructions from Wellesley. "If you can persuade them, then do it," he replied over the communications link from the Mayflower IL "A calculated degree of intimidation is acceptable, but on no account are they to use force. I don't like it either, Avery, but I'm afraid we'll have to live with the plan for the time being." the reason for the fracas..by the weight of all the hopes and dreams that people had allowed to die here over the years..Otto smiled humorlessly. "Take a look at the other lunatics around you," he suggested. "What happened to all the people? Where did your army go? They're all Chironians now. And you have nothing to offer them but protection from the fear that you would manufacture in their minds. But they have Chironian minds. They see that the fear is your fear, not theirs; and it is you who are in need of protection, not they." Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispacetime" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..inside. They grin at him, complete with pink gums, but purged of blood.."Cute little slippery thingy won't kill you, Leilani. Little thingy just wants what we all want, baby. Little got to allow me a little literary license." Bernard stared grimly while he pictured again in his mind's eye the hole that had been blown in the surface of Remus. "We've got. to stop it," he breathed. "We've got to get a message up there somehow. . . to Sterm. . . telling him what he's up against. Thousands of people are still up there." Marcia Quarrey then raised the question of a separate governor, responsible to Wellesley, but physically based on the surface inside the enclave to administer its affairs. Perhaps the division of authority between the members of the Directorate sitting twenty thousand miles away in the ship had contributed to the difficulties experienced since planetfall, she suggested, and delegating it to one person who had the advantages of being on the spot would remedy a lot of defects. Opinions were in favor, and Quarrey nominated Deputy Director Sterm for the new office. Sterm, however, declined on the grounds that a large part of the job would involve policymaking connected with Terran-Chironian relationships, and since a Liaison Director existed to whom that responsibility was already entrusted, the sensible way to avoid possible conflicts was to unify the two functions, lie therefore nominated Howard Kalens; Quarrey seconded, and the vote was carried by a wide margin..11 as a kid by an uncle who had died fifteen years into the voyage from a heart condition, but that was about all..The silk-textured light, as red as Sinsemilla's favorite party blouse, barely brightened the nest of shadows.with wonder as she contemplated the immensity of creation.."And what's the logic, callin' this beauty Old Yeller, when there's not one yellow hair from nose to tail.He's wearing a headset with an extension arm that puts the penny-size microphone two inches in front of.Being among people is helpful, too. Why else would anyone do it?" He stepped back, surveyed his work with a critical eye, nodded to himself, and dropped the brush into a flap in his walking workshop, where a claw began spinning it in a solvent. "Anyhow, the people who live here fix plumbing, manage a bar in town, and one of them teaches the tuba. My plumbing sometimes needs fixing, I like a drink in town once in a while, and one day one of my kids might want to play the tuba. They fix faucets, I paint houses. They don't want no trouble either. Now why don't-?".Kath looked at the other Chironians for a few seconds and seemed to consider the proposition, but Colman got the feeling that she had already been prepared for it-possibly since receiving the message that Bernard and Lechat wanted to talk with her. Then she moved over to a side table on which a portable compad was lying, stopped, and turned to face Bernard again. "It isn't a matter for me to decide," she said. "But the people concerned are waiting to talk to you." Bernard and Lechat exchanged puzzled looks. Kath seemed to hesitate for a second, and then looked at Lechat.
