know we can count on him to do his job until he can be replaced." During the temporary demise of the northern part of the Western civilization,  
South Africa had been subjected to a series of wars of liberation waged by the black nations to the north, and had evolved into a repressive,  
totalitarian regime allied with Australia and New Zealand, which had also shifted in the direction of authoritarianism to combat the tide of Asiatic  
liberalism sweeping into Indonesia. Their methods had merit, but produced Borfteins as a by-product..passing-for-nobody-special business. He

was using as a temporary barracks in Canaverall City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd  
intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would  
be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath.  
As Hanlon was off duty, Colman had invited him along too..Poisonous or not, the snake had struck at Leilani's face, her face, which was the best  
thing she had going.KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and  
Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he  
had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colon, and  
homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the  
wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and  
Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled  
Adam. though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt  
it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New  
England farm scene-given to her by one of her friends, Kath had said when he remarked on it-interested him. Since arriving on Chiron he had seen  
many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of  
nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians..anyway. She

information appeared on the screen. "SD guard details and timetable for posts inside the Columbia District tonight," Stanislau said. They would  
refrain from doing anything to that one until the last moment..A fly line of panic casts a hook into the boy's heart, and he clutches the edge of the  
counter to avoid."Do you want us to have to drag you there?".The power failed. They were conversing by candlelight, but the clock on the oven

candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?.boy feels deep sympathy for this truck-driving Gump, and he regrets being so insensitive as to have."And so smart," Aunt Gen said proudly, as if the girl were her daughter. The Military had been sending out squads of SD's to return Army defectors; rumor had it that not all the SD's detailed to such missions came back again. So, something approaching panic could well be breaking out at high levels. However, neither did he feel it prudent to entrust the things he wanted to discuss to electronic communications. The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged. But no Borstein was present to save the situation at the side entrance. "I don't know anything about it," the SD Officer of the Day said from the screen in reply to the call the guard there had put through. "Those orders are incorrect. Detain those men." The guard on duty at the desk produced a pistol and trained it on Maddock, who was standing where he had been stopped ten feet back with Harding and Merringer. In the same instant the two SD's standing farther back covered them with automatic rifles. "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. "Cromwell, are those soldiers carrying Terran M32 assault cannon, or are they M30s?" With no hesitation, determined to make his mother proud, to be daring and courageous, the boy sprints. Colman slowed and rubbed his chin. He wasn't in the mood. "You go on, Bret," he said. "I think I'm just gonna wander around. I guess I'd rather be on my own for a while." Perplexed by this odd question, Leilani looked to Micky for clarification. The camera tilted up, panned right: A silver Jaguar approached through the early twilight. The car. Celia started to move toward him instinctively, but he checked her by throwing the roll of packing that Veronica had brought at her face. "You're in the Army," he said gruffly as she caught it. "Move your ass." The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. "It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the events late that evening.
