"Arrogant?" Adam smiled to himself. "They're the ones who are so sure they 'know,' not me. I'm just making the best interpretation I can of the facts I've got." He thought for a moment longer. "Anyhow, arrogance and pride are not the same thing. I'm proud to be a human being, sure." Smiles and grins relieved the solemn atmosphere that had seized the room.. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks." he said. "We're all glad to hear it. Talk to you again soon." Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. Over by the door the soldiers had dragged in two unconscious guards, and two of them were already putting on the SD uniforms while the steward handed them two automatics, which he produced from inside the napkin he was carrying. "There isn't a lot of time," Lechat advised Wellesley and Borftein. "We have-to get you downstairs and into the Communications Center. Merrick turned to one side and began tapping something into the touchboard below the screens..appropriate of all her mother's fragrances..twilight, Micky proceeded with caution. Her wariness didn't halt her altogether, because she was certain. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans.. "And now I myself am off to have a nice sit-down. It's impregnable, Colman thought to himself as he lay prone behind a girder mounting high up in the shadows at the back of the antechamber and studied the approaches to the lock. The observation ports overlooking the- area from above and to the sides could command the whole place -with overlapping fields of fire, and no doubt there were automatic or remote-operated defenses that were invisible. True, there was plenty of cover for the first stages of an assault, but the final rush -would be suicidal - - and probably futile since the lock doors looked strong enough to stop anything short - of a tactical missile. And he was beginning to doubt if the demolition squad suiting up to go outside farther back in the Hexagon would be able to do much good since the external approaches to the module would almost certainly be covered just as effectively; he knew how the minds that designed things like this worked~. The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attach6 case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. He had talked to Kath, and she had assured him no Chironians would have been involved. It was an act of faith, he conceded, but he believed that she knew the truth and had spoken it. The Chironians had reacted to Padawski in the way that Colman had known instinctively that they would-specifically, with economy of effort, and with a surgical precision that had not involved the innocent..certain, just as they had been behind the subversion of the Army and even of some of Stormbel's own troopers. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit..managed a laugh even though a smile had eluded him. An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Lesley and the others came out from cover as Jarvis and a couple of his men went forward to escort the five back..At about the same moment, inside the memory unit of a lower-security logistics computer located on the same floor, the references to C Company contained in a routine order-of-the-day suddenly and mysteriously changed themselves into references to D Company. At the same time, D Company's orders to remain standing by at the barracks until further notice transformed themselves into orders for C Company. Ten minutes later a harassed clerk in Phoenix brought the change to the attention of Captain Blakeney, who

commanded C Company. Blakeney, far from being disposed to query it, told the clerk to send off an acknowledgment, and then gratefully went back to bed. Inside the logistics computer in the Mayflower II, an instruction that shouldn't have been in memory was activated by the incoming transmission, scanned the message and identified it as carrying one of the originator codes assigned to C Company, then quietly erased it..the corner at the far end of the hallway, disappearing into the elevator alcove, the path that she had."Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist.Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?".CLUMP, CLUMP, CLUMP, clump, clump, clump, clump, clump..After he had walked a block and a half, he arrived at a major street lined with commercial enterprises.. "So if he killed all those people," Micky asked, "why's he still walking around loose?". "I'm not sure it's enough," he worries, jamming his bankroll into his pocket again. "I need two bottles of
