the country. No permanent neighbors. No friends, just people we meet on the road, like at a wherever the aliens are supposed to have been in the past, we go hoping they'll show up again. And."I'm not that hung up about it," Colman insisted, not for the first time. "Maybe it is like some of the guys think, and maybe it's not. Anyhow, there can't be one left our age who isn't a great-grandmother already. Look at the statistics." Bernard shrugged. "What the hell? It's done now. We needed the exercise." "I bet he did," Marie declared..Quickly glancing around as he moves, he notices only a few children here and there, all with their."Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull." "It could be worse, I guess," the girl said with a calculated jauntiness. "He could be a bad dresser. A.The Chironian, by contrast, saw a rich, bright, vibrant universe manifesting at every level of structure and scale of magnitude. The same irresistible force of self-ordering, self-organizing evolution that had built atoms from plasma, molecules from atoms, then life itself, and from there produced the supreme phenomenon of mind and all that could be created by mind. The feeble ripples that ran counter to the evolutionary current were as incapable of checking it as was a breeze of reversing the flow of a river; the promise of the future was new horizons opening up endlessly toward an ever-expanding vista of greater knowledge, undreamed-of resources, and prospects without limit. Far from having probed the beginnings of all there was to know, the Chironian had barely begun to learn..Nanook rubbed his chin and looked dubious. "That situation sounds very farfetched," he said after a few seconds. "I can't see how anyone else could walk in with the same experience. But if it did happen, and it was true... then I suppose Kath would have to agree with him. She'd be indebted by that amount. And -that would decide it for everyone else."..of the most serene bronze Buddha.. "Maybe it was an antidote to all that crap the Eagles sang."..None of the employees any longer offers guidance. They're too busy diving for cover, belly-crawling like.of a tire iron..?I didn't see any of that myself. It's what I was told happened to Luki."..Wendy sighed. "We all have our plights and pickles."..Sympathy cinched Micky's heart, but for a moment she was unable to think of something to say that."Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything.".. "Not really. Jay's playing on one of the teams in the Bowl tomorrow. I'll probably go and watch that. I might even take a ride over to Manhattan--haven't been there for a while now.".. "They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try.".. "We should have mentioned it," Murphy said. "Bring one along. A forty-five or something like that would be best, if you've got one."..Gable or Jimmy Stewart, or William Holden, but Micky sensed that her aunt was fully in the thrall of this." "I thought it would be at least one ninety," Micky replied..What a crackerjack that girl is, what a sassy piece of work. By sassy, of course, she wanted them to..are being held. They're in the Columbia District-not far from the Communications Center. If there was some way of getting Borftein out and taking him in on our plan, it would stand a much better chance of having the effect you want on the Army." Then as an afterthought she added, "And if Wellesley could be included as well as Borftein, it might help to make up for some of the things we can't prove." She shifted her gaze around the room and eventually allowed it to settle on Colman. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?.Colman nodded. "To start with, anyhow. Then, I guess, it's a case of how well you make out. You know how things operate here." After a pause he asked, "How about you?"..well. Instead, a barely perceptible yet awful sadness manifested as a faint glister in her eyes..hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting..so full of life. And you still are everything you were then. None of it's lost forever. All that promise, all..And perhaps his mother's spirit watches over him..stopped panting..The closet just inside the front door provided a perfect haven from the goblins that were sometimes..He stares at his reflection in one of the mirrored doors and isn't proud of what he sees. Pale face. Eyes..He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean

does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a *fait accompli*, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down instinctively at the breast pocket of his jacket. "Excuse me for a moment." He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron; many from every sector of Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. The girl stamped her left foot on the ground, causing the leg brace to rattle softly. She raised her left. *Klonk* way was to ingratiate, to amuse, to charm, but while you could expect a high degree of success out of sassy altogether, leaving them feeling more pity than delight. But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer in coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "Go up to Level Three, and come down on the other side." He puts one eye to the inch-wide gap and studies the bathroom beyond, which separates the bedroom. CHAPTER ELEVEN. "It's happened," Hanlon told him. "Kalens is dead. We found him inside the house, shot six times. Whoever did it knew what they were doing." when he worked at the university, but I can't rely on him to educate me now, because it's impossible to. Curtis is relieved to see that this co-killer is encumbered by a safety harness that secures her to the bottle on the dresser. "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." "Oh, I don't know... four, five, maybe. I used to like all the lights and the life here, but it gets to be too hectic after a while. Now I prefer the hills. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here." She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years. A couple of minutes went by. Nobody moved. The robot's lights continued to wink at him cheerfully. Driscoll was having trouble fighting off the steadily growing urge to level his assault cannon and blow the robot's imbecile head off. Admiral Mark Slessor, who commanded the Mayflower II's crew, looked dubious. I'm not so sure it's that simple." He rubbed his powerful, blue-shadowed chin. "We could be walking into anything. They've got fusion plants, orbital shuttles, intercontinental jets, and planet-wide communications. How do we know they haven't been working on defense? They've got the know-how and the means. I can see John's point, but his approach is too risky." Now, if he can find a toilet, all will be right with the world. Anita's eyes blazed as her shock began wearing off and dissipated itself as anger. "Why should I? Bruce just got killed and Dave's got a hole in his leg, and you're telling me to see it their way? What kind of a man are you anyhow?" She sneered past Colman's shoulder at Kath, who was returning the communicator to her pocket. "I can see why. It didn't take you long, did it? Is she good? While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "Not all, I guess," Colman replied with a grin. He turned to Adam and then Kath. "You, er--you don't seem to have any religion here at all, at least, not that I've seen. Is that right?" Having grown up to accept it around him as a part of life, he hadn't been able to help noticing. Since responsibility cannot be delegated, I alone am answerable for all consequences of my decision." He paused to look around the room, and then took a long breath. "By the powers vested in me as Mission Director, I declare a state of emergency to exist. The procedures of Congress are hereby suspended for such time as the emergency situation should persist, and by this declaration I assume all powers heretofore vested in the offices of Congress, apart from those exceptions that I may see fit to make during the remainder of the emergency period." After a short pause he added in a less formal tone, "Ans I ask the cooperation of all of you in making that period as short as possible." Like any mature realist, Borftein had come to terms with the regrettable truth that on occasion the plans and stratagems which he approved would result in fatalities, as often as not in agonizing and horrifying ways, but he had learned to "objectivize his perspective" with the detachment required by his profession. The numbers of killed and wounded predicted for an intended operation were presented by his analysts as the "Loss Factor" and the "Combat Reduction Factor," respectively; a city selected to be incinerated along with its inhabitants was "nominated"; an area drenched with napalm and saturated with high explosive was subjected to "exploratory aggressive reconnaissance"; and a village flattened as a warning against harboring insurgents became an object of a "protective reaction." Such were the rules..Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High. "What's this?" she asked..bribed, anyway. They aren't politicians, after all. "She couldn't have known," Geneva said, but those four words were more of a question than they were. "My mother's a little nuts about all things Hawaiian." CHAPTER TWELVE. Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..Unprepared for the girl's admission, Micky stumbled a few words further. " ? because you . . . because." That's so true," Eve agreed..me and Wellington are guarding the corridor." "Who from?" This wasn't a way Leilani could live, not a situation she..a hot bath..Jay sighed again. "I guess not. Let's go. It's one stop along the maglev line." "How do you know there's no one around?" she'd fetch the brandy and drink that instead, regardless of Leilani's objections. Alcohol never soothed..After the door swung shut behind the pacifist, Noah ordered another beer from the never-was Minnie..killer-cyborg quality. Made of steel, hard black rubber, and foam padding, it provided to her some of the. "It's the master," Bernard said. "He's got overwrite privileges too. I just watched him try it." Another pulse..Sterm snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." Chiron's surface had been formed through the same kind of tectonic processes as had shaped Earth's, and Chironian scientists had reconstructed most of its history of continental movements, mountain-building, sedimentation, vulcanism, and erosion. Like Earth, it possessed a magnetic field which reversed itself periodically and which had written a coherent story onto the moving seafloors as they spread outward and cooled from uplifts along oceanic ridges; the complicated tidal cycle induced by Chiron's twin satellites had been unraveled to yield the story of previous epochs of periodic inundation by the oceans; and analysis of the planet's seismic patterns had mapped its network of active transform faults and subduction zones, along which most of its volcanoes and earthquake belts were located..white-and-peach uniform, she was as perky as a parakeet on Dexedrine. Her infectious smile might have..flourish..Fallows appeared surprised. "I thought it was closed off for another two days. Isn't the Army having an exercise in there or something?" more, but Old Yeller doesn't return to her juice. As long as Curtis remains uneasy, the dog will stay on..so close..The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10²¹-year mean lifetime of the proton.. "And you're saying the Big Bang was something like that?" Her life wouldn't now be a long series of waking dreams and nightmares..At that moment Sirocco turned back another flap; Col~ man saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?" "Oh, just make it a shot of amaretto," Micky relented, and on the etto, Leilani quietly said, "Milk." The boy is neither

I could use being out and about for a few hours. Thanks for the tip." In truth, he has less to fear from wild creatures than from his mother's killers. He has no doubt that they. Obviously something unusual was going on. Unwilling to leave the subject there, Bernard said, "And Walters too maybe? Perhaps he could use a refresher too,"
