This machine has dials and little windows with numbers in them, and switches and pushbuttons, most of which you don't understand, but you know they are for special purposes and don't matter. The main control is a metal rod, right in front of you, with a gray plastic knob on the top. The knob is dull from years of handling; it feels warm and a little greasy in your hand. The console has a funny electric smell, but the big screen, taller than you are, is silent and dark. You can feel your heart beating against your breastbone. You grip the knob harder, push it forward just a little. The screen lights, and you are drifting across the next room as if on huge silent wheels, chairs and end tables turning into reddish silhouettes that shrink, twist and disappear as you pass through them, and for a moment you feel dizzy because when you notice the red numbers jumping in the console to your left, it is as if the whole house were passing massively and vertiginously through itself; then you are floating out the window with the same slow and steady motion, on across the sunlit pasture where two saddle horses stand with their heads up, sniffing the wind; then a stubbled field, dropping away; and now, below you, the co-op road shines like a silver-gray stream. You press the knob down to get closer, and drop with a giddy swoop; now you are rushing along the road, overtaking and passing a yellow truck, turning the knob to steer. At first you blunder into the dark trees on either side, and once the earth surges up over you in a chaos of writhing red shapes, but now you are learning, and you soar down past the crossroads, up the farther hill, and now, now you are on the big road, flying eastward, passing all the cars, rushing toward the great world where you long to be..*I said the skinny grey man. "I have had a bad day today and my head is killing me.".No sweat. That was a laugh. All he'd done since he got here was sweat. Patrolling the plantation at sunup, loading cargo all day for the boats that went downriver, squinting over paperwork while night closed down on the bungalow to imprison him behind a wall of jungle darkness. And at night the noises came?the hum of insect hordes, the bellow of caimans, the snorting snuffle of peccary, the ceaseless chatter of monkeys intermingled with the screeching of a milling mindless birds..So Amos and Jack stood with the sun hi their eyes, and the great blustering North Wind squatted down to look at himself in the mirror. He must have been pleased with what he saw, because he gave a long loud laugh that nearly blew them from the peak. Someone immediately spilled the beans about Zorphwar. (I suspect it was J.L., covering his ass.) Friday afternoon Westland came slamming into my office to ask about a thousand questions about our schedules and the cost of running Zorphwar. I tried to get him to try using the program, but he was too upset to listen to reason. He gave me one hour to produce a full report justifying the project and went storming back up to the executive wing. I'm afraid that your ass and mine would have been in the sling but for a stroke of incredible luck..?I've tried living with you," Amanda said, "but it doesn't work. It turned out that they were safe from that imagined danger. There were spores in the air now, but they were not dangerous to the colonists. The plants attacked only certain kinds of plastics, and then only in certain stages of their lives. Since they were still changing, it bore watching, but the airlocks and suits were secure. The crew was enjoying the luxury of sleeping without their suits. "Okay, Rob, I'm up in the booth above the east aisle. Give me just a tickle." My nipples were sensitized to her tongue, rough as a cat's. "No neighbors?" "Si, senior. I take good care. Here comes the second reason, then. There's an evolutionary advantage to sexual reproduction that more than makes up for all the inconveniences. * In cloning, the genetic contents of new organisms remain identical with those of the original organisms, except for occasional mutations. If the organism is very efficiently adapted to its surroundings, this is useful, but it is an extremely conservative mechanism that reduces the chance of change. Any alteration in the environment could quickly lead to the extinction of a species. 217.203. started talking to herself. The Morones looked at each other in alarm. Neither of them were licensed. Lang was leaning back in Crawford's arms, trying to decide if she wanted to make love again, when a gunshot rang out in the Pod-kayne. "But why this thing?" It wasn't more than a slap, and she couldn't have been hurt But suddenly Nina's face contorted as she launched herself at him, her fingers splayed and aiming at his eyes. This time he hit her hard? hard enough to send her reeling back. It didn't surprise them too much. The Burroughs had given then: just about everything it could hi the form of data and supplies. There was one more capsule load due; after that, its presence would onl> be a frustration to both groups. There was a great deal of irony hi having two such powerful ships so close to each other and being so helpless to do anything concrete. It was telling on the crew of the Burroughs. "I have thought about it." She waited for a long time. "I think the chances are about a thousand to one." "What are you talking about?" He went down the hallway to the other bedroom. The door was ajar and he moved past it, calling. He hadn't mentioned North Carolina except that once the day before, and I was extremely interested in all subjects he wanted to avoid. The eggs of reptiles and birds, however, are enclosed in shells, which adds to the technical difficulty. The eggs of mammals are very small, very delicate, very easily damaged. Furthermore, even if a mammalian egg has had its nucleus replaced, it would then have to be implanted into the womb of a female and allowed to come to term there. "You've got to name it after me," he said as they hurried back to the garden. "That's my right, isn't it, as the discoverer?"
