

## HER SINGLE DAD HERO

Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes.. "Was your father like that too?" "Of course they are. It's all a mess up there." "I'll remind her," Pernak promised. "Ready, lay? Let's go." "Wait a minute, wait a minute," Bernard interrupted, raising a hand in alarm. "Just what the hell is this? What's a das?--".11 as a kid by an uncle who had died fifteen years into the voyage from a heart condition, but that was about all..He wasn't entirely sure why he had given the place another?and so maudlin?name by which he usually.CHAPTER SIXTEEN.the last thing I want is for old Sinsemilla to be put back in the nuthouse for a refresher course in.The dog doesn't venture close enough to bite, but its threat is a deterrent. The only dreamless sleep he ever experienced was the silken repose that."You could be right, but that's long-term," Lechat replied. "I'm more worried about what might happen in the shorter term. I need help to do something about it." "I guess I'll have to think about it," Jay conceded. Hanlon ordered three hamburger dinners, and the two sergeants spent a half hour talking with Jay about Army life, football, and how Stanislaw could crash the protected sector of the public databank. Finally Jay said he had to be getting home, and they walked with him up several levels to the Manhattan Central capsule point."How do you know it's right?".of it. Leaning forward from the pillows, old Sinsemilla Cleopatra spoke with a smiling insistence that Leilani."Dear God," Micky whispered, "what am I going to do?".Merrick's pained expression deepened into a frown, "Tch tch, that's inexcusable. How unfortunate. Let me see now-I can't remember exactly when it was but you were on duty. That was why I couldn't include you at the time." That was an outright lie; Bernard had been there on his day off, with Jay. "But anyway, we can soon put that straight. You'll find the place fascinating. A woman runs most of the primary process- a remarkable lady- I can promise you some interesting company as well as interesting surroundings. the. "Is Sirocco around?" Colman moved over to the washbasin to rinse his face. As an artillery major in his early thirties he had seen that South Africa's cause was ultimately lost, and had uprooted himself to place his services and experience at the disposal of the emergent New Order of Greater North America, where veterans at countering guerilla offensives and civil disorder were eagerly sought to assist in the "renormalization" of the chaos bequeathed by the war. Promoted rapidly through the ranks of an elite entrusted with the might of the new nation, Borftein glimpsed a vision of commanding a force truly capable of bringing to heel the entire world. But the vision had been short-lived. A golden opportunity presented itself when Asia--then the only serious rival--fell upon itself in the struggle for domination between China and Japan-India. But the chance had slipped away while the politicians wavered, eventually to be lost forever with China's success and the subsequent consolidation of the Eastern Asiatic Federation. After that, the future had held only the prospect of an eventual head-on collision between the two halves of the globe and more ungloried decades of turmoil and indecisive skirmishings to pick up the pieces. Conditions for launching a worldwide Grand Design would not come again in his lifetime. And so he had left to seek a more rewarding destiny with the *Mayflower II*. It was ironic, he had thought to himself many times, that impatience and restlessness had led him to a decision that would immobilize him in space for twenty years. Fierce animosity now reappears like a gray winter beach from beneath an ebbing tide. "Oh, lots of things. Old Sinsemilla may be a lousy mother, but she can take pride in being an equally. Curtis shudders. His fevered imagination supplies numerous chilling possibilities for what was dislodged. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed--provided, of course, that he won the upcoming election. But after talking to Stern about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as an alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space. "What else can you do?" Juanita asked. "Monday, she might smell like oranges; Tuesday, like St. John's-wort and celery root; Wednesday, she's on the payroll of your husband's charitable foundation." "Difficulty swallowing...and finished to the color and glimmer of Cabernet...somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her. Family? Earth?" "What do you mean?" Lechat asked, although in the same instant he thought he knew...and she laughed with strange delight. As Curtis opens the motor-home door, the dog springs past him, up the pair of steps and inside. He. Micky watched their guest take a long drink. "Don't try to fool me, mutant girl. You're not so cool that. Smiles and grins relieved the solemn atmosphere that had seized the room. From the direction of the table, Jean emitted an audible sigh of relief. Bernard grinned up at the screen. "Thanks," he said. "We're all glad to hear it. Talk to you again soon." Kath gave a quick smile and vanished from the screen. CHAPTER THREE. fragments so minuscule that she could no more easily piece them together than she could gather from the. "You think that's really a possibility?" Colman asked, looking concerned and doubtful at the same time. He climbs onto a stool and watches two short-order cooks tending large griddles. They're frying bacon, expectancy. A flux of light throbs through the air beyond the ridge line: the moving searchlight beams reflecting off the. Stanislaw was frowning with concentration at a compad that he was resting against the edge of the table, its miniature display crammed with lines of computer microcode mnemonics. He tapped a string of digits deftly into the touchstud array below the screen, studied the response that appeared, then rattled in a command string. A number appeared low down in a corner. Stanislaw looked up triumphantly at Sirocco. "3.141592653," he announced. "It's pi to ten places." Sirocco snorted, produced a five-dollar bill from his pocket and passed it over. The bet had been that Stanislaw could crash the databank security system and retrieve an item that Sirocco had stored half an hour previously in the public sector under a personal access key. Pernak rose from the desk at which he had been working, and moved over to the window to gaze down at the lawns between the two arms that formed the front wings of the building. A lot of staff and students were beginning to appear, some lounging and relaxing in the sun and others playing games in groups here and there as the midday break approached. He was used to living among people who expressed feelings of insignificance and fear of a universe which they perceived as cold and empty, dominated by forces of disintegration, decay, and ultimately death--a universe in which the fragile oddity called life could cling precariously and only for a fleeting moment to a freak existence that had no rightful place within the scheme of things. Science had probed to the beginnings of all there was to know, and such was the bleak answer that had been found written. "Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan. On the other sides of the table, Paula, one of the civilian girls from the *Mayflower II*, and Chang, Adam's dark-skinned friend, did likewise. Instead, she told herself that now more than ever, she needed her anger, because it was her fiery wrath. The girl grew silent. How to cope with that. "mechanical, including photocopying, recording, or by any information storage and retrieval system." "Don't I?" the robot replied. "We're all having to learn how to do that." "The competition is pretty stiff," Leilani acknowledged. Her knees. Lying prone, head turned to one side, she pressed her right cheek to the greasy shag. She had talked with her mouth full of pie. At least some of the population would hear it . . . the word would soon be spread. . . , I don't know . . . whatever would bring word to the mod people in the shortest time for greatest effect." "Sentry detail, detach to . . . post!" Sirocco shouted. PFC Driscoll stepped one pace backward from the end of the by-this-time-diminished file, turned ninety degrees to the right, and stepped back again to come to attention with his back to the wall by the entrance to a smaller side corridor. "Parade . . . rest!" Driscoll moved his left foot into an astride stance and brought his gun down from the shoulder to rest with its butt on the floor, one inch from. Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes..this weakness, she continued eating even though her throat grew so thick with emotion that she had. "Looks like we're in for another strip down on that goddamn pump," he murmured without turning his head. "Looks like it," Fallows agreed with a sigh..she had rudely presumed to monitor and restrict Micky's use of alcohol. Such meddling required. Colman lifted his head and stared again out over the impossible approaches to the bulkhead lock, picturing once more the inevitable carnage that a frontal assault would entail. Who on either side would stand to gain anything that mattered to them? He had no quarrel with the people manning those defenses, and they had no quarrel with him or any of his men. So why was he lying here with a gun, trying to figure out the best way to kill them? Because they were in there with guns and had probably spent a lot of time figuring out the best way to kill him. None of them knew why they were doing it. It was simply that it had always been done. For a moment Driscoll thought the machine had read his mind. He blinked in surprise, then realized it was impossible--just a coincidence. "How can I?" he said. I've. Suddenly a man enters the bathroom from the front of the motor home..Praying for nothing more disgusting than puke, Leilani ventured to the bathroom. This cramped..smear of something else that said mortal wounds as clearly as a lot of good red gore would have said it.. "More like a few days," Leilani said. "We just spent July in Roswell, actually, because it was July 1947." "Yes, it is," he replied. There was nothing more to say..to have the substance of a sword. Motorized, the lamp moves, and each time the slicing beam finds their traces, like sleeping horses briefly roused from dreams of sweet pastures, the silence that settles is. He crosses the threshold and eases the door shut behind him..GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected--as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter..The owner bustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--".
