Jay asked him, trying to make it simpler.. There seemed to be no more to say. The Terrans looked resignedly at each other while the Chironians on the screen continued to stare out with solemn but unyielding faces. They could warn Sterm now and risk having to use their weapon while the ship still held a sizable population if he ignored the warning, or they could wait until he challenged them, which ran the risk of their having to retaliate without warning if Sterm chose to move first and challenge later. Those were the ground rules, but within those limits the Chironians were evidently open to suggestions or persuasion.. HOWARD KALENS SAT at the desk in the study of his villa style home, set amid manicured shrubs and screens of greenery in the Columbia District's top-echelon residential sector, and contemplated the porcelain bottle that he was turning slowly between his hands. It was Korean, from the thirteenth-century Koryo dynasty, and about fourteen inches high with a long neck that flowed into a bulbous body of celadon glaze delicately inlaid with mishima depicting a willow tree and symmetrical floral designs contained between decorative bands of a repeated foliose motif encircling the stem and base. His desk was a solid-walnut example of early nineteenth-century French rococo revival and the chair in which he was sitting, a matching piece by the same cabinetmaker. The books aligned on the shelves behind him included first editions by Henry James, Scott Fitzgerald, and Norman Mailer; the Matisse on the wall opposite was a print from an original preserved in the Mayflower II's vaults, and the lithographs beside it were by Rico Lebrun. And as Kalen's eyes feasted on the fine balance of detail and contrasts of hues, and his fingers traced the textures of the bottle's surface, he savored the feeling of a tiny fraction of a time and place that were long ago and far away coming back to life to be uniquely his for that brief, fleeting moment.. searching for him in attic, closets, cellar.. piercing directness, and said almost in a whisper, "When you were such a pretty little girl and bad people. open land. can do what I need. Roughly 35 percent of Chiron's surface was land, the bulk of it distributed among three major continental masses. The largest of these was Terranova, a vast, east-west sprawling conglomeration of every conceivable type of geographic region, dominating the southern hemisphere and extending from beyond the pole to cross the equator at its most northerly extremity. Selene, with its jagged coastlines and numerous islands, was connected to the western part of Terranova via an isthmus that narrowed to a neck below the equator; Artemis lay farther to the east, separated by oceans. On the bed, Sinsemilla romped, cheering one of the combatants, cursing the other, and though Leilani, pseudofather?" "What's this?" she asked. "I see." Stern studied her face for what seemed like a long time. At last he asked in a strangely curious voice, "And if I did, what then, Celia?"

Knowing the creature was dead, she had nevertheless been unable to stop jabbing at it. Out of control..So how did people like Howard Kalens feel about Chiron? Colman wondered. Did they think they could possess a whole planet? Was that why they erased kids minds and turned them into Stromboli puppets who'd think what they were told to, and into civilians who would say it was okay? But why did the people let them do it? Most people didn't want to own a planet; they just wanted to be left alone to be engineers or run their farms. Because they played along with the rules that said they were. The bureaucrats who had mismanaged the sprawling politico military machine that had come to dominate the North American continent had been unable or unwilling to recognize his worth and dedication while they heaped honors and favors on Sons of spineless sycophants and generals' blue-eyed protégés groomed to the movie image at West Point, and he felt no compassion for them now as the laser link from Earth brought news of nuclear devastation across the length and breadth of Africa, and of titanic clashes between armies in Central Asia. "On Earth, a lot of people would see that as their big ambition in life." tires.. Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. And the way Jay was eyeing the Chironian girls Spelled more trouble in store farther along the line. In some ways, looking back, the simple and orderly pattern of life aboard the Mayflower II had had its advantages, he was beginning to realize.. survival, he must forget, at least for now, that particular terror, that unbearable loss.. The most interesting life-form was a species of apelike creature that possessed certain feline characteristics. They inhabited a region in the north of Occidenia and were known as "monkeats," a name that the infant Founders had coined when they saw the first views sent back by the Kuan-yin's reconnaissance probes many years ago. They were omnivores that had evolved from pure carnivores, possessed a highly developed social order, and were beginning to experiment with the manufacture of simple hand tools. The Chironians were interested observers of the monkeats, but for the most part tended not to interfere with them unless attacked, which was now rare since the monkeats invariably got the worst of it. Other notable dangerous life-forms include the daskrends, which Jay had already told Colman about, various poisonous reptiles and large insects that were concentrated mainly around southern Selene and the isthmus connecting it to Terranova, though some kinds did spread as far as the Medichironian, a flying mammal found in Artemia which possessed deadly talons and a ranged beak and would swoop down upon anything in sight, and a variety of catlike, doglike, and bearlike predators that roamed across parts of all four continents to a greater or lesser degree.. Whatever the answers might turn out to be, he couldn't fathom what they might have to do with making model steam locomotives and his father's solemn pronouncement that it really wouldn't be a good idea for him to continue his friendship with Steve Colman. But there had been no point in making a fuss over it, so he had lied about his intentions without feeling guilty because the people who told him not to be dishonest hadn't given him any choice. Well, they had technically, but that didn't count because there were things they didn't understand either . . . or had forgotten, maybe. But Steve would understand.. Simpson, Westley, Johnson-all of them. They were all back. "We heard you could use some help, chief," Driscoll announced. "Couldn't leave it all to the amateurs?" Ribald comments and hoots of derision greeted the remark.. Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from the situation, ready to strike again.. "Just a bunch of hooley ?" "Not a ballerina, I assume." Geneva said, "Well, if it's the police asking after Luki?" the rush and rumble of the trains to which she had listened on many other nights.. of the painful past on which her life was built. She slid her guarded dessert, untouched, in front of Leilani.. Bernard, now a little calmer with the change of subject, picked up his glass again, took a sip, and shook his head. "Aren't you overreacting just a little bit, Jerry? Exactly what kind of trouble are you talking about? What have we seen?" He looked from side

to side as if to invite support, "One idiot who should never have been allowed out of a cage got what he asked for. I'm sorry if that sounds like a callous way of putting it, but it's what I think. And that's all we've seen." "Dumb." Curtis eases off the bed.
