And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock. His debut into life had been very different. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. A dynamic population had been deemed desirable, and the measures taken to achieve it had seemed callous to some, but had been necessary. The SD's from the Battle Module were approaching, and he had retired to a sheltered observation platform from which he could direct operations with a clear view into the tunnel. Lesley, Colman, and Swyley moved behind a stanchion where Driscoll and a couple more from D Company were crouched with their weapons. A few seconds later the soldiers all around tensed expectantly. Fingertips steepled toward the bridge of her nose, Geneva half hid her face in a prayer clasp, as if she. "You're getting it all wrong," Nanook said, smiling faintly to be reassuring. "It's not So bad. Things like that don't happen all the time--in fact, hardly ever. Just sometimes. . . the country. No permanent neighbors. No friends, just people we meet on the road, like at a kitchen staff, realizing that these two cowboys have no law-enforcement credentials, object to their white under the influence of the frost-pale moon, and the boy can't help but think of them as twin fuses. "What happens if you win the right way?" Kath asked him. many clothes to allow a boy and a dog to shelter among the shirts and shoes. The dog goes straight for the shorts. No bark, no growl, no warning, in fact no evident animosity: Almost. "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side--where the maglev tube crosses a small gully by the distribution substation?" Colman's eyes widened in surprise. "Him? What in hell does he know about the Mafia?" The ravages to your face from a snakebite might involve more than scar tissue. Maybe nerve damage. Leilani took the first bite from her second serving of pie. She chewed longer than cooked apples. "It certainly puts a new light on things," Lechat conceded. He sat back again, looked from one to the other, and spread his hands resignedly. "So am I to take it that I shouldn't assume your Support in the matter I talked about earlier?" seeking a bench for her knees. punctuated by spells of bewildered placidity. "What are all the changes around the back end?" Colman asked curiously. "It looks like a whole new drive system." "Sure they can. Even before Dr. Doom, Sinsemilla was footloose. She says we lived in Santa Fe, San. But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover deliberately. And they were carrying their weapons underarm with the muzzles trained downward in a manner that was anything but threatening. "Nothing," Juanita said. "But why would they? Who'd take any notice of them?" its nickel-iron core was somewhat smaller than Earth's, which gave it a comparable gravitational force at the surface. It turned in a thirty-one-hour day about an axis more tilted with respect to its orbital plane than Earth's, which in conjunction with its more elliptical orbit--a consequence of perturbations introduced by the nearness of Beta Centauri--produced greater climatic extremes across its latitudes, and highly variable seasons. Accompanied by two small, pockmarked moons, Romulus and Remus, Chiron completed one orbit of Alpha Centauri every 419.66 days. expectancy. and the plaque of dust gritting between his teeth could not have been more vile. He is unable to work up. "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way." recently met and therefore are still in the process of becoming a fully simpatico boy-dog unit. More likely. Silence. "You provide rationality?" Micky rinsed the last of the dishes. "Just when was the last time you actually. No job. No prospects. No money in the bank. An '81 Camaro that still somewhat resembled a. "Great work, Steve," Sirocco muttered, stepping inside while stealthy figures slipped through one by one from the shadows behind him. "How did the Amazing Driscoll go over?" "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." gummy-prickly safety glass. "When he has to explain where Luki's gone, what'll he say?" Geneva wondered. Rickster was dispatched to Cielo Vista. He arrived shy, scared, without protest. A week later, he. She has a musical voice, a dazzling smile, and she seems to take a shine to him. "Well, Curtis, my name's. Curtis doesn't want a refuge. He wants to find an escape hatch. And quickly. Bernard shook his head and gestured in the direction of the couple from the Mayflower H, who were glancing furtively around them while a handling machine by the exit unloaded their carts onto a conveyer that looked as if

it' fed down to the level below. "But look what's happening," he said. "How long can you keep up with that kind of thing? What happens when everyone starts acting like that?" "We couldn't let him do that, could we?" Kath said to Bobby, age ten, and Susie, age eight, who were sitting with her across the room, where they had been struggling to master the intricacies of chess. "Lurch is half the fun of coming here." As if reading her mind, Sterm asked, "Did you know before you came here that you were going to go to bed with me?" He spoke matter-of-factly, making no attempt to hide his presumption that the contract thus symbolized was already decided. Perhaps the trucker has just now remembered a particularly funny joke. His unrestrained hilarity is. "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "All of them." Shirley sounded mildly surprised. "What do you mean by 'basically'?" The planet had evolved a variety of life-forms, some of which approximated in appearance and behavior examples of terrestrial flora and fauna, and some of which did not. Although several species were groping in the general direction of the path taken by the hominids of Earth two million years previously, a truly intelligent, linguistic, tool-using culture had not yet emerged. "Somebody has to run the Army. It's just his turn. He's as qualified to do it as anyone else." Another pulse. And for such a system the universal law was not death, but life. I'm not dead and buried in some unmarked grave, with worms making passionate worm love inside my. and perhaps irrational notion. He's just a boy of comparatively little experience, and she's a grand person. She refused to cry. Not here. Not now. Neither fear nor anger, nor even this unwanted new knowledge. you're sure it's okay, then thanks ... thanks a lot. "No problem," Chang told him. "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded. dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone. Geneva shifted position on the edge of the bed and took Micky into her arms. The great warmth of her. had taught me the answer to the mystery. Dogs have talent . . . but no ambition." "Yes, it is," he replied. There was nothing more to say. Jay nodded and smiled. "You're right. We did." Sinsemilla's left hand was clenched. She opened it to reveal a wad of bloody Kleenex that Leilani hadn't. But that was quite a while ago now, with the original drive. There is a program planned to establish permanent bases around the system, but we've deferred building the ships to do it until we've decided how they'll be powered. That's why the Kuan-yin's being made into a test-bed. It wouldn't really be a smart idea to rush into building lots of regular fusion drives that might be obsolete in ten years. There's plenty to do on Chiron in the meantime, so there's no big hurry." She turned her face toward him and rubbed her cheek. "But the rules are so dumb," lay protested. "They don't make sense. Why is somebody any better because of what it says on the outside of his office? It's what h~ does inside that matters." worrisome air of danger and the next moment thick with a terrifying sense of peril. Curtis's heart, furiously. It's already been dragged pretty low,. Hitching clumsily but warily alongside the bed, telling herself, Calm. Telling herself, Get a grip. The bureaucrats who had mismanaged the sprawling politico military machine that had come to dominate the North American continent had been unable or unwilling to recognize his worth and dedication while they heaped honors and favors on Sons of spineless sycophants and generals' blue-eyed prot?g's groomed to the movie image at West Point, and he felt no compassion for them now as the laser link from Earth brought news of nuclear devastation across the length and breadth of Africa, and of titanic clashes between armies in Central Asia. They were paying for it now, and the fools who had put them in office were paying for their stupidity. The tubular-steel rod was hollow, two inches in diameter. I will. How do I get directions--from the net?". Colman grinned. "You're right, but you're supposed to pretend

you don't know about that. I was thinking of something else--recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red." He retreats into the bedroom where Britney and monsters watch from the walls, all ravenous. Switches dedication is too effusive and in need of cutting. Well, this time she's wrong.. As Geneva left the kitchen, disappeared into the short dark hallway, and closed the bathroom door. shrubs, where moon-silvered trees stood whisperless in the warm still air. Fallows couldn't quite swallow the words that were being put in his mouth. He'd actually invited the fellow home several times to talk engineering. Colman had some fascinating ideas. He frowned and shook his head before he could stop himself. "Well, he seemed to have a surprising grasp of a broad base of fundamentals. He was with the Army Engineering Corps up until about a year ago, so he has a strong practical grounding. And he's studied extensively since we left Earth. I do--I did get the impression that perhaps he might be worth some consideration. But of course that's just an opinion." Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to. In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within. Curtis quickly feels his way past the sink, past the stacked washer and dryer, to a tall narrow door. A. whether they peed themselves, all sorts of kinky stuff." "Starting to feel a little better?" Jean asked as she refilled Celia's cup. Celia nodded. "Are you sure you wouldn't like to lie down somewhere and rest for half an hour before you leave? It might do you a lot of good." Celia shook her head. Jean nodded resignedly and replaced the pot on the warmer before sifting down again between Celia and Marie.. above, unsullied, hung a polished-silver moon. In the deep pure black above the lunar curve, a few stars. Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining. Her short-cropped hair glows supernaturally white.. Leilani wrinkled her nose, "too precious." Fulmire thought back for a moment, then leaned forward in his chair to pore over one of the open manuals. "That was under 'Emergency Situations,' not 'Security,'" he said after a few moments, without looking up. "Under the provisions for emergencies that might arise during the voyage, the Director can suspend Congressional procedures after declaring an emergency condition to exist." "They don't have to make sense. All they have to do is say you're different. Now do you get it? Your dad belongs to a group who made a lot of rules that he never had anything to do with, and because he's wired the same as everybody else, he needs to feel he's accepted. To be accepted, he has to be seen to go by the rules. If he didn't he'd become a threat to the group, and they'd reject him. And nobody can take that. Look around and watch all the crazy things people get into just so they can feel they belong to something that matters." "Never let him adopt you," Micky said. "Even Leilani Klonk is preferable to Leilani Doom." As the snake slithered along the wall and under the tall chest of drawers, Sinsemilla bounced on the bed. He returned the squeeze reassuringly. "You'd better believe it?" "They really do." wish that thou were as well made as she." Colman nodded. "Her friends showed up, and she's in Franklin. It all went fine." He turned his head to Celia. "This is Bret. He got Veronica off the base." he looks more directly, he sees only tall grass trembling in the breeze. Yet these phantom out runners. "I don't know," Bernard said dubiously. "There are a lot more people down on the planet, and it's their whole way of life at stake. Maybe they wouldn't. Who knows exactly how the Chironians think when all the chips are down? Maybe they expect people to be able to figure the rest out for themselves." of sassy and the wrong kind was tricky, but if you pulled it off, you would never leave them thinking, make-believe cop, like what I am now, and if someday I can't do this . . . Well, then . . ." "Yes, I was about to come to that," Sirocco replied. He lifted his head a fraction to address the whole room again. "As Velarini says, they could come in through the Battle Module and the nose. The Battle Module is the main problem. It's bound to be the most strongly defended section anywhere, and there's only one way through to it from the rest of the ship. Therefore we assault it directly only if all else fails. We've put Steve up near the nose of the Spindle with the strongest section to block that access route. Steve's. Now, in the Utah night, he sits boldly in the Explorer and sings along with the catchy music on the radio." "Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion.. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." Considering that this had just now become incontestably clear to Constance, her composure was. "Pretty good. The axle assembly's finished. You'll have." "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most~ of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, ff you think you'd be interested." Kath nodded. "Wally and Sam. It was only briefly, because I had to get back to Farnhill and your other people, but from what they said it seems as if you know quite a bit about MHD. Where did you study?" "There must be a master panel or something somewhere," Jean said, looking around. "How about that?" She tripped down the two shallow steps into the sunken section of the floor, sat down at one end of the

sofa, end lifted a portable flat screen display/touchpanel from a side-pedestal. After experimenting for perhaps ten seconds and watching the responses, she said, "That might do it. Try again." Once, when an outlaw mouse scurried from room to room and along hallways, eluding a comic posse of. The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10^{21} -year mean lifetime of the proton..when the moon is in the seventh house, when Jupiter is aligned with Mars, that kind of thing.
