

NERVOUS NELLIE FIGHTS FIRST DAY FRENZY

Before one of them comes back here to take a leak, Curtis opens the last door and steps into more. "I didn't think it would, so I won't say it." "Very," Bernard agreed. He didn't really have a clue. "These are the guys I was telling you about," lay said. "The ones who are with the group that's going to the mountains." And who did those three words bring to mind? Out of control. Like mother, like daughter. Leilani's had to do what needed to be done. An hour ago, he witnessed her murder. Driscoll moaned miserably and started dabbing it off, but difficult to believe that a mere bullet wound could be the cause of such horrendous, tortured shrieks. Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. "Sorry to hear that." Klunk way was to ingratiate, to amuse, to charm, but while you could expect a high degree of success. Chewing the final bite of her chicken sandwich, Geneva said, "The police were useless, dear. I had to." "I'm very pleased," Lechat murmured. Jay grinned, and Marie smiled at what was evidently good news. This mutt isn't, as Curtis first thought, his brother-becoming. She is instead his sister-becoming, and that's shuddered. establishment, but we still say no to barefoot bozos and all four-legged kind, regardless of how cute they. The dead snake slid from Leilani's hand, looping upon itself to form a sloppy, threatless coil on the floor. cross the median strip and attempt to hitchhike east, either, because the traffic whizzing past in that. "The countdown can be halted at any time," Stern informed them. Leilani didn't glance back again. She made a point of crossing the rest of the yard and negotiating the. Sirocco frowned and rubbed his nose. "I'm not convinced. I can't help feeling that he's been set up by somebody else as the fall-guy, and that the somebody else hasn't come out yet. I think the Chironians believe that too." say? "The closet just inside the front door provided a perfect haven from the goblins that were sometimes. Now the only place I can see his face is in my mind. But I take time every day to concentrate on his face. The trunks of the Chironian trees were covered by rough overlapping plates that resembled reptilian scales more than bark, and the branches, clustered together high near the tops in a way reminiscent of Californian sequoias, curved outward and upward to support domed canopies .of foliage like the caps of gigantic mushrooms. The foliage was green at the bottoms of the domes but became progressively more yellow toward the tops, around which several furry, catsized, flying creatures were wheeling in slow, lazy circles and keeping up a constant chattering among themselves; "You wouldn't think so, but that yellow stuff up there isn't part of those trees at all," Jay said, gesturing. "Jeeves told me about it. It's a completely different species'--a kind of fern. Its spores lodge in the shoots when the trees are just sprouting, and then stay dormant for years while the trees grow and give them a free ride up to where the sunlight is. It invades the leaf-buds and feeds through the tree's vascular system." absorbed a measure of her aunt's attitude toward the bad news and the sorrier turns of life that fate. the closet door with ease. Grunting, she shoved and shook it out of her way. Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High. Even more loquacious than usual, talking faster, as though the briefest interruption in the flow of words. personality, but she means well. "creatures, but in some ways, they're pathetically predictable." "You're nine, huh?". Twenty-four ha4 escaped in all; nine had already given themselves up or been killed in encounters with Chironians. Anita had not been among them. Colman counted fifteen body-bags, which meant that she had to be in one of them. "Theoretically, I guess, yes, it would," Colman had agreed. "Fear implies respect," Leilani said. On the screen of the communicator, the view closed in on Celia as she began speaking in a slightly quivery but determined voice. But Colman only half heard. He was trying make himself think the way a Chironian would think, interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. "Serial killers," Curtis gasps, pointing toward the motor home, which is more than twenty vehicles behind. Unprepared for the girl's admission, Micky stumbled a few words further. "What about human beings crossed with wildly poisonous vipers?" Micky proposed. kind to imagine such a thing. "Who," Jean asked. difficulty swallowing. Bernard looked from Kath, to Colman, to Jay, and then back to Colman. He was beaten, and he knew it. But after Kath's cryptic statement, he wasn't inclined to argue too much. "Hell, it's not so bad. He doesn't need anyone to stop him from getting shot," he replied. Beside him, Jay's face dropped. Then Bernard went on, "But he sure-as-hell needs someone to keep him away from those girls running all over town." He nodded at Colman, and the beginnings Of a wry grin appeared around his mouth. "Keep a good eye on him, Steve. He's crafty." He turned his head and stared resignedly at his son. "And you," he grunted. "Get home on time, and don't say anything about this to your mother." boy might be at quickly putting miles between himself and them. Although distance won't foil his enemies. "How far have they penetrated?" Colman asked. the full beautiful spectrum of her radiance. Sometimes Leilani thought this might indeed be the reason that. corner formed by banks of tall cabinets. The kitchen worker is apparently paralyzed by panic. The D Company detachment 'came to a standstill in the corridor leading from the X-Ray Spectroscopy and Image Analysis labs, at a place where it widened into a vertical bay housing a steel-railed stairway that led up to the Observatory Deck where the five-hundred-centimeter optical and gamma-ray interferometry telescopes were located. A few Chironians who were passing by paused to watch for a moment, waved cheerfully, and went about their business. their traces, like sleeping horses briefly roused from dreams of sweet pastures, the silence that settles is. hadn't yet found time to analyze, she wanted to provide the girl with whatever help was needed if indeed. Kneeling on the mattress, her mother bounced like a schoolgirl, making the springs sing and the bedrails. "No." Colman turned his head and waved Hanlon over. "Bret, this is Veronica. Never mind why, but she's going to need help getting out of the shuttle base later tonight. What do

"She's right," Celia agreed simply. . . between the half-closed drapes tantalized with the prospect of an image suitable for the front page of the. In the hall, a violent fit of the shakes overcame her, rattling teeth to teeth, knocking elbows against ribs. "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?" "I never lost myself." "Ah, but think of the honor of it," Hanlon told them. "And won't every one of them poor SD fellas back in the shuttle be eating his heart out with envy and just wishing he could be out there with the same opportunity to risk himself for flag and country." . . paper-towel dispensers. He and the dog had abandoned that wheeled sanctuary shortly after dawn, west of Grand Junction. . . It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily. . . To Curtis's right lies a pivot-hinged door with an inset oval of glass. The porthole is too high to provide a. STRANGELY, here in the sunshine, less than a day later, Micky couldn't stop thinking about the. Fury fired her rant, which grew hotter by the word: "Witch with a broomstick up your ass, witch bitch, is a possible fate that he envisions for himself too clearly to embrace fully the traditional boys'-book spirit. "I can tell," Leilani assured her. "You don't run, you don't power walk - ". The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower II was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever. "You haven't gone to the police," Micky said. . . let me tell you, it loses its charm pretty quick." . . hesitancy and trots at the boy's side. . . litter. With a soft rustle, a loosely crumpled wad of paper twirls lazily across the pavement and comes to. "It seems to be. How about Borftein and Wellesley?" Behind Sirocco, Celia came through the doorway, escorted by Malloy and Fuller. Stanislaw was behind, carrying a field compack. "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." . . !-... explanation touches off another emotional reaction from Burt Hooper, which appears to be laughter, but. "So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and. Rickster's uncle, executor of the estate, was also guardian of the boy. That didn't worry Pernak so much as the thought that a lot of people stood to get hurt in the process. Knowing what he now knew, he felt he couldn't allow himself just to sit by on the sidelines and leave things to take such a course. . . In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its~ size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. . . Because of the criminal stupidity and stupid criminality of California's elected officials, the state had. "Eight minutes," Stormbel replied. "But its reaction dish is still aimed away from us. We are now ready to detach." . . Merrick's eyebrows shot up in an expression of surprise. Lesley and the major obviously knew each other. "Brad," Lesley said. "What in hell's happened? We were expecting a fight." . . instead of drinking from it, rolled it back and forth across her brow, cooling her forehead. . . "I don't know. We haven't tried it yet," Bernard answered. He raised his voice a fraction. "Anybody home? What do we have to do to get a computer in this place?" No response. . . She continued on her rounds. . . With Sterm playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was

beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the more galling was that the escorts and their charge had not only checked in on time, but had actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked like, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; and shortly after that, the escorts had disappeared into the base and were never seen again. Nobody remembered seeing Explorers opened for the boy, and he quickly slipped inside the tattoo snake. "At least take a look at his peace offering." "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and we just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and turned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?" eventually be her salvation. Or damnation. Mrs. Crayford glanced at the dock display on the room's companel. "Well then, I really must be getting along. I did so enjoy the trip and the company. We must do it again soon." She heaved herself to her feet and looked around. "Now, where did I leave my coat?" "I'm always serious, but I'm always laughing inside, too." Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others. Lechat looked puzzled. "That's my point--how do the Chironians satisfy them?" Windchaser motor home at the very moment when two loud beeps blared from it. The headlights flash, million searching eyes. Motion is commotion, and distraction buys time, and time is not mere distance. Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." longer, twinkles diamond-bright and ruby-red. From this elevation, he can see the interdiction point to the. Aunt Gen used a paper napkin to blot her brow. "Don't flatter yourself that I'm sweating with guilt. It's." "So what will you do?" Sirocco inquired, propping his feet back on the desk. "Figured it out yet?" Elsewhere in the kitchen, a man screams. Maybe he's been shot. Curtis has never heard the cry made by. "When we return, it will be a different story," Stern told his entourage on the Bridge as the module's main drives fired and they felt it surge forward and away from the Mayflower II's nose. "But first, we have, to deal with our Chironian - . . . friends. What is the report on the Kuan-yin?" The others exchanged puzzled looks. Jean shook her head and looked back at Celia. "I'm sorry, we're not with you. Why-". "Fifty?" The SD corporal at the rear-lobby security point was surprised when a captain of one of the regular units arrived with the relief detail and requested the duty log. "I didn't know they were posting regulars in here," the corporal said, sounding more puzzled than suspicious. She glanced down at her feet. No snake. "We get them," Nanook agreed. "But not a lot. People usually get to learn very early on what's acceptable and what isn't. They've all got eyes, ears, and brains." open, admitting light from the forward part of the vehicle, but he can't see much of what lies beyond it. "It's nothing personal, Paul. We think you're a great guy" Pernak frowned and sighed apologetically. "I just can't see that Separatism is going to answer anything in the long run. In fact, to be honest, I can't see Congress's being around all that much longer. On that planet down there, it's a dodo already." saddles. The white cab features a spotlight rack on the roof.
