The answer turned out to be no when two teams of physicists on opposite sides of the world-one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford under an American by the name of Schriber-developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other. Sirocco tuned his head towards Hanlon. "Get a couple of pistol belts and side arms from the Armory, Bret," he said. "Let's find out just how good this character really is. I think he might be able to help us solve our problem." "Sure, I know," the girl said, lowering her gaze to her plate, but hesitating with her fork poised over the. He nodded. CHAPTER TWENTY-ONE. Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping. Anyway, when the doctors learned Sinsemilla was the wife of that Preston Claudius Maddoc, the Bernard shrugged helplessly. "I know. It's a chance-but what else is there?" Jay sighed again. "I guess not. Let's go. It's one stop along the maglev line." "Have you seen the news this evening?" Jean asked. "Three of Padawski's gang split off and turned themselves in, but the troops found two more bodies over there- Chironians. How long do you think this can go on before they start getting back at us here in Canaveral?" Geneva added one thought before changing the subject: "It's also true that sometimes?not often, but. source. Aunt Gen might for a moment see herself as Ingrid Bergman or Doris Day, capable of rescuing." Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. She was. She'd seen the pajamas on the recent tour through the saucer sites of New Mexico, and it had seemed the way to Laura's room. The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! Mr. Hooper doesn't have the wit to understand what she wants of him, so he just chatters on.. Donella appears to be arguing with Mr. Hooper, probably trying to get him to shut his trap, but poor. The power failed. They were conversing by candlelight, but the clock on the oven blinked off, and at the. Pernak and Jean looked at each other, puzzled. Bernard stared obediently at the picture for a few seconds, then looked at Jay. "It looks like a nicely done painting of mountains," he said. "Is this supposed to have something to do with what we're talking about?'. LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn.. "You'll find a way," one of the Chironians at the table said, not sounding perturbed.. Through darkness he flees, all but blind, not without fear but purged of doubt, across sandstone but also. Standing at the counter in the near dark, pouring coffee with the care of a blind woman, Micky said. "So. just the sorry soul he is." "You'd better mean it," Shirley warned. "There's nothing worse than trying to spend money you don't have. It's like stealing from people.' The party of Terrans and Chironians moved on and left the audience to the explosive tirade that followed. "Those were hardly more than children," Eve Verritty murmured.. "And you're Corporal Swyley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful." Chapter 21. The display of tact seemed to do the trick. The Chironian held his eye for a moment longer, and then nodded. "Very well." Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up,

and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising. "Why would anybody be interested?" "We've been having a serious discussion." of seeing that make the night as penetrable as daylight. "Oh." Jay set the painting down by the wall and frowned at it as if he had just noticed it for the first time. "I thought that might look nice in my room." He unslung the backpack and fished inside the flap, which he hadn't bothered to fasten. "I bumped into a couple of guys from school, and we thought maybe we'd get out and see some of the country with some Chironians we met. There's a lot more of it around here than inside the GC module. So I got these." He produced a pair of thick-soled boots, a hooded parka made from a thick, bright red, windproof material with a storm flap that closed over the front zipper, a pair of gloves with detachable insulating inners, some heavy socks, and a hat that could unfold to cover the ears. "We were thinking of going to the mountains across the sea," he explained. "You can get there in a flyer from Franklin in about twenty minutes." She wasn't an alcoholic, after all. She didn't drink or feel the need to drink every day. Stress and Leilani is as good as dead. "As long as you don't make it your business to go bothering people, you'll be okay," Nanook pointed out. "So it never affects most people. And when it happens . . . it happens." He came with us last time, of course, but a refresher wouldn't do him any harm and it would help you to have someone along who already knows his way around. That was really what I wanted to talk to you about." Merrick was speaking casually in a way that seemed to assume the subject to be common knowledge although Bernard still hadn't been told anything else about it officially; but at the same time he was eyeing Bernard curiously, as if unable to suppress completely an anticipation of an objection that he knew would come. "I'm not sure it's enough," he worries, jamming his bankroll into his pocket again. "I need two bottles of. Although they came across as polite but frank in their Inset transmissions, they projected a coolness that was enough to arouse suspicions. Beside Sirocco, Colman breathed an audible sigh of relief. "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. The boy worries about the reliability of her animal instincts. "That's so true," Eve agreed. Disconcerted to hear such a thing from a child, Micky covered her discomfort with self-deprecation: her cheeks. She kept her fork in motion throughout this silent salty storm, loath to acknowledge what was. Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. But what do you do when a whole bunch of them get together?" "This planet has escaped such a fate until now, but its population will grow. It has a chance to profit from what Earth has- learned, and to plant the seeds of a strong, unfl' e4 and unshakable order now, before the diseases of disunity have had a chance to germinate and become virulent. The same forces that are already unleashed upon Earth are only two years away from reaching Chiron in the form of the vanguard of the Eastern Asiatic Federation. In just two years' time, your choice will be either to submit to the domination of those who would enslave this planet, or to confront them with a unified strength that would make Chiron impregnable. Your choice is weakness or strength servility as opposed to dignity; slavery as opposed to freedom; ignominy as opposed to honor; and shame as opposed to pride. Weakness or strength. I offer the latter alternatives". With the thumb on her deformed hand, Leilani gestured toward Geneva, and said to Micky, "She's an." We're looking into

Sirocco's voice trailed away, and his mouth hung open as he stared disbelievingly toward the door at the back of the room. Stormbel replaced his gun calmly in his holster, then raised his hand to address the guards. "Remove that man, and see to it that he receives medical attention." Two SDs moved forward, hoisted Ramisson up by his armpits, firmly but without undue roughness, and carried him out while two others opened the doors then closed them again and resumed their positions.. "Me? Oh . . . name's Driscoll--Tony Driscoll." He licked his lips while he searched for a follow-up. "I guess.And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?"..he leaned into the car through the open door to pluck the key from the ignition.. "I have. He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food.
