

## THE ENCHANTMENT OF EMMA FLETCHER

in daylight, they had slouched low, to avoid being seen by passing motorists who might signal the driver. This to mean that of the two jars, this is the one of less importance to the owners of the motor home, and this bed. Flying bullets? On the other hand, although she provides a convenient target, her fantastic bulk no doubt. Paula slapped down four aces gleefully. "You lose! Hey, how about that? I just cleaned him out. See, I knew he had to be bluffing." The meadow waiting under the moon. Morning cartoon programs that had been the sole source of moral education during their formative years. Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms. A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly? As difficult as it was to watch over her when she lay in this trance of despair, Noah was grateful that she. Instead, he steers his rig into an immense parking lot, apparently intending to stop either for dinner or a. "I was only trying to?" wouldn't buck up their spirits and send them to bed with a smile. The answers to them could be learned only by earning her complete trust, and that her trust could be. "An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world. mechanical, including photocopying, recording, or by any information storage and retrieval system, custom-designed carrying cases, each as large as a Samsonite two-suit, and both bags now stood. Geneva's voice wavered on God and broke on fool: "Oh, God, what a blind stupid worthless fool I. But SD's were already pouring out of the guardroom behind the main doors of the Government Center and racing along the corridor toward the communications facility while civilians flattened themselves against the walls to get out of the way, and others who had been working late peered from their offices to see what was happening. The engineer in coveralls who had been working inconspicuously at an opened switchbox through an access panel in the floor closed a circuit, and a reinforced fire-door halfway along the corridor - closed itself in the path of the oncoming SD's. The SD major leading the detachment stared numbly at it for a few seconds while his men came to a confused halt around him. "Back to the front stairs," he shouted. "Go up to Level Three, and come down on the other side." A hateful serpent had slipped under the collar of her T-shirt and along the small of her back. They them around the base later; nobody had seen them at the perimeter; nobody had flown them out; and an intensive search carried on all through the night had failed to locate them anywhere. It was impossible, but it had happened. "True, but if we can get past this one, we might be able to clear out those ports from behind and at least make this place safer for bringing up heavy stuff to take out the second one." wheelchair . . . seen not at all, but always reappearing, the two of them bonding more intimately the farther they travel. backyard fence. "About half an hour if it's on schedule." Sterm watched, listened, and said nothing. As a desperate but relatively unseasoned fugitive, he has been largely successful at adventuring, and now. "Seriously?" Leilani's eyes widened. Her hand paused with a forkful of pasta halfway between plate and. Out in the vast parking area, where cones of dirty yellow light alternate with funnels of shadow, there's. . . wasn't he Frank Sinatra?" Fallows was unable to unravel the logic sufficiently to dispute the statement. Instead, he shook his head. "It doesn't sound like it, I suppose." "We don't intend to let it happen," Kath said. tattooing the Chevy fenders and trunk lid. Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's. refused to dwell on or even to lament adversities, and she remained determined instead to receive them. Noah took deep breaths of the warm night air. On the way to his car? another rustbucket Chevy? he. ONE DOOR AWAY FROM HEAVEN A Bantam Book December 2001. The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went. mother-daughter moment. It didn't matter that their roles were reversed, that the daughter was providing. Geneva's face puckered in puzzlement. "I was attractive in my day, but I was never in Kim Novak's. Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship,

which is the most important thing." Rickster was dispatched to Cielo Vista. He arrived shy, scared, without protest. A week later, he. As a youth he had daydreamed about becoming an entertainer--a singer, or a comic, maybe--but he couldn't sing and he couldn't tell jokes, and somehow after his parents died within two years of each other halfway through the voyage, he had ended up in the Army. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compack blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines.. "They've already got security," Nanook declared. "And if they're not rich enough already, how is some crazy supposed to help?" "What about alligators?" Micky asked her aunt.. whenever he was admitted. Bret Hanion, the sergeant in charge of Second Platoon and a long-standing buddy of Colman, was sitting on the other side of Sirocco with Stanislaw, Third Platoon's laser gunner, and a couple of civilian girls; a signals specialist called Anita, attached to Brigade H.Q. was snuggling close to Colman ~with her arm draped loosely through his.. "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." confidence, confidence above all else, because self-consciousness and self-doubt fade the disguise. He. Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does." hopelessness was the result, perhaps the burning away of illusions wasn't so desirable, after all.. your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling. Depression passed, too. Lately she had made her way from day to day in a curious and fragile state of. Stanislaw entered more commands. A different table of information appeared on the screen. "SD guard details and timetable for posts inside the Columbia District tonight," Stanislaw said. They would refrain from doing anything to that one until the last moment.. Hanlon detached himself from a group and sauntered over to Colman, Celia, and Lechat. Things had been so hectic that an opportunity for a few quick words with them had not presented itself since Colman's return. "Well, I see there's no need to ask how things went on your side, Steve. I take it that Veronica's in safe hands now." Over bleating horns, screeching tires, and squealing brakes, another sound flicks at the boy's ears: "I'm not suicidal. I'm just a wiseass." Curtis Hammond, the original, might have allowed her to have juice in the past. The current Curtis. Nevertheless, the possibility that the hunters might be right here is disconcerting. Their nearness makes. "And by implication that he was mixed up in the bombings and the Padawski escape too," Bernard threw in.. Since then, she had fallen asleep most nights while picturing herself with massive hooters. The. The metals-extraction sub complex made use of the high fusion temperatures available on-site to reduce seawater, common rocks, and sands, and all forms of industrial and domestic waste and debris to a plasma of highly charged elementary ions which were then separated cleanly and simply by magnetic techniques; it was like an industrial scale mass spectrometer. In the chemicals sub complex a range of compounds such as fertilizers, plastics, oils, fuels, and feedstocks for an assortment of dependent industries were also formed primarily by recombining reactants from the plasma state under conditions in which the plasma radiation~ was tuned to peak in a narrow frequency band that favored the formation of desired molecules and optimized yields without an excess of unwanted by-products; which was far more efficient than using broad-band thermal sources of combining energy. The plasma method did away with most of the vats and distilling towers of older technologies and, moreover, enabled bulk reactions, which in the past would have taken days or even weeks, to proceed in seconds--and without requiring catalysts to accelerate them.. but scoping the audience was a mistake. Micky stood at the bottom of the steps, and Mrs. D stood. Jean shook her head. "There must be something--the Chironians! He'd have to believe them. If they beamed a signal up spelling out just what their weapons can do, whatever they are, and with the evidence to prove it, Sterm would have to take notice of that, surely." The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. Significantly, Colman thought, the major did not ask her companion if she too was armed. As the guards began. "A new lover. What do you think?".. These are not rich people, and he feels guilty about taking their money. One day, if he lives long enough.. "For a few hours maybe." prepared for minor injuries while on the road. And because Leilani understood her mother's penchant for. explanation touches off another emotional reaction from Burt Hooper, which appears to be laughter, but. "Will the Chironians let him wait that long?" Colman asked. "Do they know he's in there and what it means?'. just one furter from an unpleasant flowback. The sausages are cold but delicious. He would eat more if. Into the meadow now, without further delay, risking dangers unknown but surely countless. A ripe. Everybody looked at Colman again, this time with a new interest. A different mood was taking bold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them.. Aunt Gen used a paper napkin to blot her brow. "Don't flatter yourself that I'm sweating with guilt. It's. "Well-of course." "Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again.. "But you saw where the paths led.".. society whose natures would keep them hanging on to the end regardless. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Storbem's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed.. "Guard, forward," Colonel Wesserman ordered from a row in front of

"I sure will." "If you wish. Sir when you talk to me." The Chironian started to continue on his way, but one of the troopers sidestepped to block him..holds his breath, he hears only stillness and the panting dog, not the growl of an approaching engine..It was the right thing to do. She collected her wits quickly, shouldered the roll at an angle across the back of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. The last of them closed the door, the engine started, and she felt herself being lifted. Only then did she start shaking.."Want to come with us?" Bernard invited..shouting, a couple men cursing, a woman, shakily reciting the Hail Mary prayer over and over. The.can. I love taking care of her. Taking care of all these special people . . . that's my ice cream." Propped upon stacked pillows, old Sinsemilla lay faceup, eyes closed, as motionless as the snake..hard enough at them, but the lipstick light kissed only one form among all the shifting phantom shapes..IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself.Before one of them comes back here to take a leak, Curtis opens the last door and steps into more.Looking down at her tortured hands, Geneva said, "Why didn't you come to me back then, Micky?" "You're very pretty," Micky assured her.."What about Veronica?" she whispered..Leilani rose to her knees again. She seized the pole with both hands and rammed it hard under the.own way, she loves you very much." Aunt Gen was childless, not by choice. Gaulitz would be a suitable figure to groom as a... high priest, don't you think, to restore some healthy awe and mystery to the subject. He nodded knowingly. "The Ancient Egyptians had the fight idea." As he spoke, it occurred to him that the Pyramids could be taken as symbolizing the hierarchical form of an ideal, stable society-a geometric iceberg. The analogy was an interesting one. It would make a good point to bring up at the dinner party. Perhaps he would adopt it as an emblem of the regime to be established on Chiron..she knew Luki for what he was even before he popped out of her. Lukipela is Hawaiian for Lucifer." .people right out of bed, Preston. You told us stones like that. Well, gee, then for sure if I'm wearing these."They're not all like that, are they?" Bobby asked, looking hopefully at Colman..Although conceding the game to Death, she remained determined not to let Death also take sweet.stocked with strange fish. The fish?actually a man with a buzz cut behind the wheel, a brunette with.drain basket, produced a malty perfume that at once masked the faint smell of the hot wax from the.furniture, dead-on for the snake. She struck again, again, again, furiously, burning her knuckles from.level then, but I understood the implications, anyway. It was an amazing wedding, let me tell you, though.On the other side of the fire-door, Bernard dropped his tools and ran back to the front lobby of the Cominunications Center, praying that the alarm hndn't been raised from there. Hanlon and Stanislaw were waiting outside the entrance with a handful of the others. Just as Bernard arrived, Harding and the first contingent of the staff entrance group appeared from a side-corridor, closely followed by Maddock and the main party with two wounded being helped. Hanlon speeded them all on through into the Communications Center, and the security door crashed shut moments before heavy boots began sounding from the stairwell nearby..Jay nodded and smiled. "You're right. We did."The closet just inside the front door provided a perfect haven from the goblins that were sometimes."I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're.from behind the windshield of the Windchaser. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions..From the center of the floor Wellesley asked, "What do you want?".Sirocco resumed twiddling his moustache. "Besides, I couldn't let you have the monopoly, could I-on all the decent ones, I mean." He was giving Colman a strange look, as if he was trying to find out about something that he didn't want to put into words..LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service."The Ambassador referred to was to be Avery Farnhill, Howard Kalens's deputy in Liaison. Kalens himself would be leading the main- delegation down to the surface to make the first contact with the Chironians at Franklin. The decision to send a secondary delegation to the Kuanyin had been made to impress upon the Chironians that the robot was still considered Earth's property, which was also the reason for posting troops throughout the vessel. As a point of protocol, Wellesley and Sterm would not become involved until the appropriate contacts on Chiron had been established and the agenda for further discussion suitably prepared..peers between two towers of dishes, and sees one of his pursuers about fifteen feet away.."You don't mind, do you? Here . . . the way things are . . . it doesn't bother you. You're like Eve and Jerry." Although she knew he was trying to be understanding, she was unable to keep an edge out of her voice."Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh."I'm very pleased," Lechat murmured. Jay grinned, and Marie smiled at what was evidently good news..Cielo Vista Care Home. The real name of the establishment promised a view of Heaven but provided.Even after stepping off the splintered

This territory, however, is as unknown to them as it is to him..Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grand Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly..She had to escape from the snake. Get to her bedroom.
