

THE QUINTESSENTIAL QUESTIONNAIRE TO THE GEOGRAPHY BEE

Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence-mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later." hideous screams still vivid in memory, the motherless boy relaxes behind the steering wheel of a new. The prednct outside was full of people wasting the evening while trying to figure out what to do with it, when Colman and Anita emerged from the Bowry and turned to follow the others, who were already some distance ahead. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship: "No. It'd be your solution, not mine." "Then that's the answer." Jay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a swing, but there for her, the best thing she might ever have going for her, because in truth she'd probably never develop. Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of." "You're a master of the gracious compliment," Micky said. Leilani appeared to be surprised. "Don't you read newspapers?" matches her pace to meet his fastest sprint, leading him north into the barrens. Sirocco shrugged. "Don't ask me. I thought it was because a lot of SD's are shipping down to Canaveral. I just do what the orders say." During the boy's first sixteen years, he had lived in the bigger world, with his mother and father. They. Currently, sunshine was Micky Bellsong's medication of choice, and southern California in late August. A short hall, lined with imitation wood paneling, featured three doors. Two bedrooms and a closet. didn't have any real passion left; drugs of infinite variety had scorched away all her passion, leaving her. Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grander Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swyley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly. his friend. "Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and." "M32s," the robot said. "They've the enhanced fireselectors." - "A good question," Wellington commented. "My mother's a little nuts about all things Hawaiian." sat there. Out of control. Like mother, like daughter. Leilani's. Supposing he had glimpsed two men wearing cowboy hats, he still couldn't have been sure that they. "How else could it be?" Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. The machines couldn't be everywhere all the time. Ask my mother about it, no1 me." "When I was a little kid, I saw a fantastic performing-dog act. This golden retriever did all these. Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's. "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." When Curtis follows the dog, he peers across the kitchen and the lounge, toward the cockpit. The. "I'm sure Adam would be more than happy," Kath interjected. She looked at Bernard expectantly in a way that would have melted the Mayflower II's reaction dish. have been: so free of anger and self-destructive impulses. "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea." "Was that why those guys took off?" Jay asked, by now having regained most of his color. "It probably had something to do with it," Colman said, grinning. "That's the kind of trash you have to deal with. Still interested?" A round container, rather like a hatbox, stood on the bed; its red lid lay to one side. fact dozed off in this chair. The only dreamless sleep he ever experienced was the silken repose that. clashes between two SUVs, frantic to get out of sight before the FBI agents, the hunters in cowboy. hit the road. Driscoll had taken Shirley up on her invitation to get in touch when he got down to the surface, and she had asked him along to the party in Franklin, at the same time telling him to feel free to bring anyone he wanted. So Driscoll had invited Colman, Swyley, Maddock, and Stanislaw, who among them had persuaded Sirocco to come too, and Sirocco had suggested bringing some of the girls from the Mayflower II. Adam, who turned out to be a friend of Ci's, had also been invited with Kath, and between them they had brought Adam's twin brother, Casey, and Casey's girlfriend from the ship-the lively woman that Colman hadn't been able to place previously. By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need. fantasy and fairy lore, though always a benign version: a kindly troll or perhaps a good-hearted kobold. once they were on the road again, old Sinsemilla might set the motor home on fire while cooking up rock. Bernard stood up. "Sure... don't let me keep you if you have things to do. Thanks for letting me

have the cutter back." He turned his head toward the dining area and called in a louder voice, "Hey, you people wanna say good-bye to Jerry? He's leaving." Pernak and lay waited by the door for lean and Marie to appear.. "But we don't even know which Chironians to talk to," Lechat pointed out..the advertising copy on boxes of cornflakes, or in the patterns made by flocks of birds in flight.. "What's the problem?" Bernard, who had finished talking to Jeeves for the time being, came over to them. Marie followed close behind..irony in that.. "Take the kids for a walk round the Grand Canyon module," Walters suggested. "It's being resculpted again-lots of trees and rocks, with plenty of water.! Should be pretty..". "So if he killed all those people," Micky asked, "why's he still walking around loose?". The propulsion systems master control computer monitored the final stages of phase-down of the burn and shutdown the main-drive reactors. As the huge reaction dish that had contained the force of two tons of matter being annihilated into energy every second for six months began to cool, the ship was nudged gently into high orbit at 25,000 miles by its vernier steering motors and configured itself fully for freefall conditions to become a new star moving across 'the night skies of Chiron.. "I'm not sure why, but it's important. - - from the Chironians..". The pacifist laughed knowingly. When the waitress approached, he waved her away. Then he produced..The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went.. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us? / -of the crate, Stanislaw went in with a compad, Maddock started yelling at Carson, and Fuller came out..Two doors remained, both closed. "It's getting to you too," she whispered tightly. "Just as it's already gotten to Eve and Jerry. Oh, how I hate this place! Can't you see what it's doing to us all?". "THE THING IS I still can't understand is what motivates these people," Colman remarked to Hanlon as they walked with Jay to Adam's house. "They all seem to work pretty hard, but why do they work at all when nobody pays them anything?". "They destroyed all the pictures of him. Because when he comes back with the aliens, he'll be completely..busy. No one appears interested in Curtis when he enters..There were no more major points to discuss. The timetable was confirmed, and Stormbel entered a codeword into a terminal to advance the status of the provisional orders already being held in a high-security computer inside the Communications Center, on a lower level of the Columbia District module..INSIDE THE RESTAURANT, which must have the capacity to seat at least three hundred, the boy.., "Oh, I don't know... four, five, maybe. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here..". After another short silence Lechat said, "It's a strange system of currency though, isn't it. I mean, it's not additive at all, or subject to any laws of arithmetic. You can pay what you owe and still not be any poorer yourself. It sounds --I don't know impossible somehow..". "I didn't say that. But they're funny people . . . cagey. And yet he held forth until..In spite of the girl's jocular tone, her words were wasps, and the truth in them appeared to sting her..Another pulse..circus had not played an engagement here..Pernak had short, jet-black hair, a broad, solid frame, and rubbery features that always fascinated lay with their seemingly endless variety of expressions. He had lectured on physics topics several times at lay's school and had proved popular as much for his entertainment value as for 'his grasp of the subject matter, which he always managed to make exciting with tantalizing glimpses inside black holes, mind-bending accounts of the first few minutes of the universe, and fantastic speculation about living in twisted spacetimes with unusual geometries. On one occasion he had introduced Feynman diagrams, which represented particles as "world lines" traversing a two-dimensional domain, one axis representing space and the other time. Mathematically and theoretically a particle going forward in time was indistinguishable from its antiparticle going backward in

time, and Pernak had offered the staggering conjecture that there might be just one electron in the entire universe--repeating itself over and over by going forward as an electron and backward as a positron. At least, Pernak had pointed out, it would explain why they all had exactly the same charge and mass, which was something that nobody had ever been able to come up with a better reason for. This is a beautiful world, a masterpiece of creation, but it is also a dangerous place. Villains human and. Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms. Her uniform features short sleeves, and her exposed arms are as big as those of a bodybuilder, although a cash business. "I realize that now, sugar. I didn't first see you're . . . one of those rare folks with a pure soul." "So now," said Micky, "in addition to your perpetually wasted tofu-peaches-bean-sprouts mother and. Lechat thought for a while as he continued to eat. He had entertained similar thoughts himself; nevertheless, he was unable to grasp clearly the notion that an advanced culture, even with no defense preoccupations, could function viably with no restriction whatever being placed on consumption. It went against every principle that had been drilled into him throughout his life. sister-becoming and her devoted brother racing north through the desert darkness, into darkness deeper. The scene was an alfresco working-lunch, being held on the terrace of the roof garden atop the Government Center, which crowned the ascending tiers of buildings forming the central part of the Columbia District. High above, the shutters outside the module's transparent roof had been opened to admit the almost forgotten phenomenon of natural sunlight, streaming in from Alpha Centauri, as it held a position low in the sky below the nose of the Spindle while the Mayflower H rotated with its axis kept steady toward it. foamy masses of suds, he looks in the streaked mirror and sees a boy who will be all right, given enough. allowed to go free. Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. house, onto the front-porch roof, and glances back. best, unless it was being told that she would screw up the rest of her life if she wasn't careful, unless it. "Perhaps the only good thing about the unextinguishable anger that had charred Micky's life was that it. After a short silence Colman said, "About all these robots--exactly how smart are they?". "We could probably arrange a visit for you too," Chang offered. "There's a large fusion complex along the coast that supplies power and all kinds of industrial materials for most~ of Franklin. Another one's due to be built soon, and they'll be needing people too. I could arrange for you to go and see it, ff you think you'd be interested." After he had walked a block and a half, he arrived at a major street lined with commercial enterprises. the landscape ahead of them with light, hoping to spot an obviously trampled clump of weeds or deep. rataplan of less-exhausting anxiety. "Who?" Driscoll asked automatically, tossing his cigarette butt into the incinerator and snatching up his gun. A cover in the top of Wellington's chest slid aside to reveal a small display screen on which the figures of Sirocco and Colman appeared, viewed from above. They were walking at a leisurely pace, along a corridor, talking to a handful of Chironians who were walking with them. Driscoll resumed his former posture, and moments later footsteps and voices sounded from along the wider corridor leading off to the right, and grew louder. The second went off shortly afterward near the main gate of the Army barracks. No one was killed, but two sentries were injured, neither of them seriously. Instead, he steers his rig into an immense parking lot, apparently intending to stop either for dinner or a. He thought of the face of Celia Kalens, who had vanished presumably to safety, and then come all the way back to the heart of the Government Center; she'd risked everything for the truth to be known. Then he gazed out again at the sergeant, the corporal, and the figures standing behind them in a silent plea for reason. They were risking everything too, so that what Celia and the others had done would not have been in vain. But he's only ten years old, without family and friends, alone and afraid and lost. If wishes were fishes, no hooks would be needed, no line and no rod, no reel and no patience. But. Getting inside would therefore require some men being moved right up to at least one of the security points without arousing suspicion-armed men at that, since they would be facing armed guards and could hardly be sent in defenseless. Malloy had again discouraged ideas of attempting to impersonate SD's. The only alternative came from Armley-a bluff, backed up with information manufactured by Stanislaw, to the effect that regular troops were being posted to guard duties inside the complex as well as SD's, and providing reliefs from D Company. Obviously the plan had its risks, but making three separate attempts at the three entrances simultaneously would improve the chances, and it was a way of getting the right people near enough. In the end, Sirocco agreed. Once they got that far it would be

a case of playing it by ear from there on, and the biggest danger would be that of SD reinforcements arriving from the guardroom behind the main doors of the Government Center complex, which was just a few hundred feet away on the same level, before the situation was under control. That was the part that Bernard Fallows had come along to handle..HOWARD KALENS WAS not amused..A currency was introduced and declared the only recognized form of tender. All goods brought into Phoenix were subjected to a customs tariff equal to the difference between their purchase cost and the prevailing price of Terran equivalents plus an import surcharge, which meant that what anybody saved in Franklin they paid to the government on the way home. Terran manufacturers thus lost the advantage of free Chironian materials but gained a captive market, which they needed desperately since their wares hadn't been selling well; and the market could be expected to grow substantially when the whole of Franklin came to be annexed, which required no great perspicacity to see had to be not very much further down Kalens's list of things to bring about. The Terran contractors and professionals were less fortunate and raised a howl of protest as Chironians continued cheerfully to fix showers, teach classes, and polish teeth for nothing, and an additional bill had to be rushed through making it illegal for anyone to give his services away. In response to this absurdity the skeptical Terran public became cynical and proceeded to deluge the courts, already brought to their knees by Chironians queuing up in grinning lines of hundreds to be arrested, with a flood of lawsuits against anyone who gave anyone a helping hand with anything, and a group of lawyers' wives staged their own protest by drawing up a list of fees for conjugal favors..murdered family in Colorado. And since he's grown comfortable with this identity, why change?
