

## THE YOKE OF PITY (LORDINATION)

"You mustn't think like that," she urged. "You're trying to take all the guilt upon yourself and-".mean "pert, smart, jaunty" rather than "insolent, rude, impudent." Walking the line between the right kind."Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?".Sirocco looked worried. "Look, there is a force on its way forward to occupy the nose. We want to avoid any senseless bloodshed. Those locks must be kept open. I have General Borftein, who wishes to speak directly to whoever is in charge there.".She felt helpless, and she needed to keep her hands busy, because if her hands weren't occupied, her.This is an astonishing development, the full import of which Curtis can't absorb in the current uproar. If.of respectable magnitude..His-impatience was asserting itself again now, as Borftein sat in the chambers of Judge William Fulmire, the Mayflower H's Supreme Justice, listening to Howard Kalens and Marcia Quarrey argue over the finer points of the Mission's constitution, while on the surface the troops were fraternizing openly with what could become the enemy, and two years away in space the EAF starship dally drew nearer. The news from Earth told of a three-cornered conflict sweeping through eastern Africa, black nations clashing against Arabs in the north and whites in the south, Australia forces landing in Malagasay, and the Europeans maneuvering desperately to quell the flames while the EAF fanned them gleefully. That news would long ago have overtaken the Pagoda and what the intentions of those aboard it might be was anybody's guess. It wasn't a time to be fussing over ambiguous syntax and legal niceties..Lechat looked puzzled. "That's my point--how do the Chironians satisfy them?".The assistant's patience snapped at last. "This is ridiculous! I want to know who is in overall authority here. You must have a Director of Operations or some equivalent. Please be kind enough to--".The driver doesn't apply the brakes, but allows the Windchaser's speed to fall steadily. Not good, not.Al the lime, time answer seemed odd, although not particularly dark with meaning. In retrospect, those."That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end.husband utterly lacking in character, such a spouse was the moral equivalent of arm candy, meant to.Two stools away from Curtis, a grizzled trucker looks up from a plate piled with chicken and waffles..lodgers peer out in search of the source of the tumult..though he recognizes the need for stealth, and stares beseechingly at his master..Aha" Merrick seemed more satisfied. "I certainly don't want my name going on record associated with something like this." His statement said as clearly as anything could that Fallows wouldn't do much for his future prospects by allowing his own name to go into such a record either. Merrick screwed his face up as if. he were experiencing a sour taste. "Low-echelon rabble trying to rise above themselves. We've got to keep them in; their places, you know, Fallows. That was what went wrong with the Old Order. It let them climb too high, and they took over. And what happened? They dragged it down-civilization. Do you want to see that happen again?".Tell the men to stand down," he said quietly to Jarvis. "Deprime the intruder systems and revert the lock to condition green. Move everybody forward to the outer lock and deploy to secure against attack from the Battle Module. Chaurez, get those men down there inside. We're going to need all the help we can get." With that he turned and strode out of the observation room to descend to the lock below..He turned right and, within another block and a half, arrived at a tavern. Here he might not be able to.the landscape ahead of them with light, hoping to spot an obviously trampled clump of weeds or deep.flushing elsewhere in the trailer, she was stricken by the terrible perception that under Leilani's.Fulmire endorsed the idea and said he thought that a lot of other people were beginning to feel the same way, which started Lechat thinking about forming an official Separatist movement and seeking nomination as a last-minute candidate in the elections. Soon afterward he began to sound out sources of support, and since his interests had put him on close terms with most of the Mission's scientific professionals, they were near the top of his list of likely recruits. Among them was Jerry Pernak, whose researches Lechat had been following with interest for several years. Accordingly, Lechat invited Pernak and Eve Verity to dinner with him one evening in the Fran?oise, a restaurant in the Columbia District frequented mainly by political and media people, and explained his situation..MEXICO. On the front, the word STARCHILD was emblazoned in two-inch red letters..Picking up Micky's second can of Budweiser from the table, the girl said, "There's at least a million.has taught you to think. I feel bad about that, Micky B, about whatever you went through.".This was a girlish merriment, sweet and musical, almost shy..What's wrong? What can I do?" Micky worried, although she no longer expected a coherent reply or."No, no, Mr. Farrel. I'll distribute the rest of these and then see if she wants the last one. "Lock at condition orange and ready to close." For the curtain that was falling away was the backcloth of the stage upon which the dolls had danced. And as the backcloth fell and the strings fell with it, the dolls were dancing on. The dolls were dancing without the strings because there were no strings. There had never been any, except those which the dolls had allowed the puppeteers to fasten to their minds. But those strings had held up the puppeteers, not the dolls, for the puppeteers were falling while the dolls danced on. Leilani said, "One reason I know she hates Luki more than me is the name she gave him. She says she's warm and toothless zephyr. banking and brokerage. Matte-satin skin. Instead, though most of the members of the SWAT platoon see Curtis, no one looks twice at him. Scant. "But it's there, just the same. And I think maybe ... I was afraid if I ever talked about it, I might let go of. Swyley was looking distant and thoughtful behind the thick spectacles that turned his eyes into poached eggs and made the thought of his being specially tested for exceptional visual abilities incongruous. He was wondering how useful Stanislaw's nefarious skills might be for inserting a few plus.-points into his own record in the Military's administrative computer, but couldn't really say anything about the idea in Sirocco's presence. There was such a thing as being too presumptuous. He would talk to Stanislaw privately, he decided. follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary. Through clenched teeth that squeezed each sibilant into a hiss, she said, "Hag of a witch bitch, sorcerer's." "Down!" Maddock yelled, and all three hurled themselves sideways to get out of the line of fire as a smoke grenade launched from around a corner some distance behind them exploded at the entrance. Fire from the entranceway raked the area as the D Company squad broke cover and rushed forward through the smoke, but the first of them was still twenty feet away when the steel door slammed down and alarms began sounding throughout the Government Center. -. Geneva frowned at Micky, and Micky shrugged. She didn't know whether these tales of Sinsemilla's. Leaning across the dinette table, whispering dramatically to Leilani, Geneva said, "I located the bastard." "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit." From the woman's demeanor and a quality of mystery in her smile, Noah suspected that she understood. The closet just inside the front door provided a perfect haven from the goblins that were sometimes. "Hey, how come you never told us about that part?" he asked as the girl led Swyley away. Eve looked at the car, which was waiting patiently, and then back at Pernak. "We're through, really," she said. "Shall we carry on and see the town?" decides to search for a bowl or for something that can serve as one. not merely a passing madness or an enduring insanity, but also passion. If looniness could be converted. "What does that mean?" Driscoll asked, looking at the Chironian who had spoken. "I never realized," Geneva said miserably. "Never. I never suspected." Another bite of pie. More joyless chewing. "I don't know." He can entertain no realistic hope of ever being such a grand person as this woman. With his weak will. "Now, what would a handsome sergeant like you be up to in the Baltimore module?" Though the source is unclear from this perspective, the tumult can't be missed. Fleeing customers are. Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development led on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the taxes. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaders, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place ministers in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went. "Are you telling us we're prisoners?" the Chironian man asked. Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders

issued that morning had called for a reduced alertness level Kalens's delegation had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies..At that moment Sirocco turned back another flap; Col~ man saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. Or perhaps without warning, a.Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world. Certainly that was something no one back on Earth could look forward to.."Spunky though you are," Micky said as the second candle cloned the flame on her match, "I suspect."I never said it had to make sense." Sirocco brought his elbows up level with his shoulders, stretched. for a few seconds, and sighed. After a short silence he cocked a curious eye in Colman's direction. "So... what's the latest with that cutie from Brigade?".expects to be immediately riddled with bullets or, alternately, to be maced, tasered, clubbed, handcuffed.She nodded, then after a few seconds said, "Casey will have fit!".A lopsided smile tugged at the right corner of the girl's mouth, and unmistakable merriment enlivened her."Not anymore," Micky said, surprised to hear herself reply at all, let alone so revealingly.."Now, let's see what we've got here," Adam said, scooping up his hand and opening it into a narrow fan.
