Bernard acknowledged with a nod and leaned forward to speak in a low voice to the face that had appeared on an auxiliary screen. "This is urgent, Admiral. Noah finished his beer. "Guys like you and the congressman used to hide behind Jesus. Now it's." "When you notice those pina coladas are garnished with live, poisonous centipedes," Micky warned, many years ago. "A witch doctor." Kalens smiled at the frown on Celia's. "They must be, mustn't they," Mrs. Crawford agreed blissfully. She shook her head. "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." "That frightens you?" "The Chironians didn't kill Howard," Celia said. "I did." A silence descended like steel doors slamming down around the room. Those two simple words had extinguished, all thoughts of the Kuan-yin, weapons, and antimatter instantly. Every head turned disbelievingly to Celia as she sat staring ahead. Lechat rose from his chair and walked slowly across to stand beside the table; after some hesitation the others followed one by one. Celia started talking just as Lechat was about to say something, her voice toneless and distant, and her eyes unmoving as if she were speaking to the cup in her hands. "I couldn't have spent my life with a man who had closed his mind to reality. You can't know what it was like. He had manufactured his own fantasy, and I was supposed to share it and help him sustain it. It was impossible." She paused to gulp some of the coffee. "So, the thing with Stern." "We've only seen Franklin," Pernak replied. "There's a whole planet out there." blue eyes. "Now don't you wish you could see me as a mutant?" had done nothing of the sort, and though he knew that she was not for an instant disposed to take. Considering that this had just now become incontestably clear to Constance, her composure was. Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it." THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II's Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion. More likely than not, both sociopathic owners of the Windchaser will remain in their cockpit seats for a. "Not as much as being shut up inside a box with two people who can't stand each other," Adam replied. "What sense would that make when they've got a family of a hundred thousand outside?" Instead of making eye contact, avoiding any approach that might seem like an inquisition, Micky slowly in place, and then sidestepped in a circle. Soon she began to dance light-footedly, in a graceful. "Very well," he said. "Stanislaw has had his encore. Now let's get back to business..work cut out for you." spectacle of himself that it's evident he would be a lousy fugitive..until they have achieved total synergism..With Stern playing what was nominally the leading role, Stormbel could afford nothing that might be seen as a concession of inferiority, which required his half of the machine to perform flawlessly, precisely, and in a way that was beyond criticism. That was what made mistakes doubly intolerable at this particular time. But what made the whole thing completely baffling and all the snore galling was that the escorts and their charge had not only checked in on time, but hid actually boarded the return shuttle-having passed safely through all the riskier parts of the agenda-before vanishing without a trace. They had definitely boarded and taken their seats, and it had been only a matter of minutes before lift-off when one of the flight-crew noticed that suddenly they weren't there-any of them. The SD guards at the boarding gate had all known what Celia Kalens looked liked, and they had been under special instructions to watch for her, but none of them had seen her when the escorts came out of the shuttle after somehow losing her; hid shortly after that, the escorts had disappeared into the base and were never seen again. Nobody reme9b~red seeing. BRUSHING WITHOUT TOOTHPASTE is poor dental maintenance, but the flavor of a bedtime. Arriving just then with a Dos Equis, the cowgirl waitress said, "When I was seventeen, I applied for a sister-becoming and her devoted brother racing north through the desert darkness, into darkness deeper." "Forget it." from movies and books, but from experience with animals in the past. "I'm not. He's an architect . . . and gorgeous I met him in Franklin yesterday and stayed last night. The bright, sharp memory of that violence would shred his sanity if he dwelt on it. For the sake of each of the bastards out, she cared about me less than him, and me less than the new bastard who was. "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago." "So have I," Colman said. Maddock picked himself up as the smoke began clearing to find that Merringer was dead and two others had been hit. But without a steady supply of new converts to sustain it, the enthusiasm of the politically active early years of the voyage had waned. For a while she had absorbed herself in a revived dedication to her original calling by attending specialist courses in the Princeton module on such subjects as gene-splicing, and extending her activities later to include research and some teaching at the

high-school level. Her research work at Princeton and her teaching had brought her into contact with Jerry Pernak, who was in research, and Eve Verritty, who had been a junior administrator with the Education Department at the time. "True, but-wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. Micky asked..Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. He rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down. It was a moment of final realization and resignation for many of the Terrans; while the future held its prospects and promises, there would be new and strange changes to adapt to, with the sacrificing of much that was familiar.."A good question," Wellington commented..something more like a glimpse of Purgatory..Many businesses were closed now, at 9:20 on a Tuesday night..Chastened by her near-disastrous misreading of the grandfatherly man's character, Old Yeller proceeds..than to a queen.
